Village Board of Trustees of the Village of Barrington Hills,
112 Algonquin Road
Barrington Hills, IL 60010

Re: Project: Site Improvements for Varda Development
Location: 99 & 101 Bateman Road, Barrington Hills, IL 60010
CE #: CE23.003

Dear Village Board of Trustees of the Village of Barrington Hills,,

On behalf of Varda Contractors, we are submitting with this letter review materials regarding improvements at the subject property located at 99 & 101 Bateman Road, Barrington Hills, IL 60010.

Enclosed with this letter are:

- Proposed Preliminary Subdivision Plan dated 02-23-2024
- Plat of Survey – Vanderstappen Land Surveying INC. (VLSI), Job Number 230138, on 08/10/23
- Legal description of property Exhibit dated 02-22-2024
- Subdivision Application Form
- Adjacent Property Affidavit
- Complete List of all permanent parcel located within 250 feet of the property

Should you have any questions or comments about this matter, please contact me.

Sincerely,
Caldwell Engineering Ltd.

Michael Caldwell, PE CFM
President

PRELIMINARY SITE IMPROVEMENTS FOR VARDA SUBDIVISION BARRINGTON HILLS, IL

PROPERTY LOCATED AT:
BATEMAN RD.

GENERAL NOTES:

1. TOPOGRAPHY INFORMATION FROM HEAGER & ASSOCIATES LLC, JOB NUMBER 16–188, "BATEMAN ROAD PARCEL PLAN DATED 02/20/2017," CONTOUR LINES WERE REFINED WITH THE FLAG DATA INCLUDED WITHIN THE H&A 16–188 DWG FILE. BOUNDARY SURVEY PROVIDED BY VANDERSTAPPEN LAND SURVEYING INC. (VLSI), JOB NUMBER 230138, ON 08/10/23. THE CONTRACTOR SHALL VERIFY THE EXISTING CONDITIONS PRIOR TO CONSTRUCTION AND SHALL IMMEDIATELY NOTIFY CALDWELL ENGINEERING LTD. AND THE CLIENT OF ANY DIFFERING CONDITIONS.

CONTRACTOR NOTES:

1. ALL WORK SHALL BE IN COMPLIANCE WITH APPLICABLE FEDERAL STATE AND LOCAL BUILDING CODES, REGULATIONS. ORDINANCES AND STANDARDS INCLUDING ADA AND OR OTHER HANDICAP ACCESSIBILITY CODES.
2. CONTRACTOR SHALL COORDINATE WITH THE OWNER'S VENDORS REGARDING SCHEDULING AND SEQUENCING OF THE WORK.
3. THE CONSTRUCTION NOTES AND DRAWINGS ARE SUPPLIED TO ILLUSTRATE THE DESIGN AND GENERAL TYPE OF CONSTRUCTION DESIRED AND ARE INTENDED TO IMPLY THE FINEST QUALITY OF CONSTRUCTION. MATERIAL AND WORKMANSHIP THROUGHOUT.
4. THE DRAWINGS ARE NOT TO BE SCALED. FOR INFORMATION CONCERNING EXISTING CONDITIONS. ETC., VERIFICATION MUST BE DONE IN THE FIELD. LARGE SCALE DRAWINGS HAVE PRECEDENCE OVER SMALL SCALE DRAWINGS.
5. PRIOR TO COMMENCEMENT OF ANY CONSTRUCTION. CONTRACTOR SHALL VERIFY EXISTENCE AND LOCATION OF ALL EXISTING ABOVE AND BELOW GRADE, UTILITIES, INCLUDING SANITARY SEWER, STORM SEWER, WATER, GAS, ELECTRICAL, TELEPHONE, ETC. ANY DISCREPANCIES IN UTILITY LOCATIONS SHALL BE BROUGHT TO THE IMMEDIATE ATTENTION OF THE ENGINEER OR OWNER.
6. THE CONTRACTOR SHALL BE RESPONSIBLE FOR VERIFICATION OF ALL BUILDING DIMENSIONS PRIOR TO BEGINNING CONSTRUCTION AND SHALL IMMEDIATELY NOTIFY THE ENGINEER OF ANY VARIANCE OR DISCREPANCY AFFECTING NEW CONSTRUCTION PRIOR TO PROCEEDING WITH WORK.
7. THE CONTRACTOR, UPON COMPLETION OF PROJECT, SHALL OBTAIN ALL FINAL INSPECTIONS AS REQUIRED BY LOCAL JURISDICTIONS AND FURNISH THE OWNER WITH EVIDENCE OF ALL SUCH INSPECTIONS.
8. CONTRACTOR IS RESPONSIBLE FOR ALL SITE CUT & FILL TO ATTAIN FINISH GRADES AS INDICATED ON THESE DRAWINGS. GENERAL CONTRACTOR SHALL INCLUDE THE COST OF ANY TOPSOIL REQUIRED IN ADDITION TO THAT ON SITE.

8. ALL UNPAVED AREAS OF RIGHT–OF–WAY ARE TO BE SODDED. RESTORE RIGHT–OF–WAY WITH SIX (6) INCHES OF TOPSOIL AND SOD.
9. STORM AND SANITARY SEWER LINES SHALL BE CLEANED OF ALL CONSTRUCTION DEBRIS AND SILT PRIOR TO VILLAGE INSPECTION.
10. IT SHALL BE THE RESPONSIBILITY OF THE DEVELOPER (OWNER) AND THE CONTRACTOR TO ABIDE BY, ADHERE TO AND PERFORM ALL WORK IN ACCORDANCE WITH THE REQUIREMENTS, SPECIFICATIONS, STANDARDS, PRACTICES, POLICIES AND CODES OF THE VILLAGE WHICH INCLUDES BUT IS NOT LIMITED TO LABOR, MATERIALS, PROCEDURES AND SAFETY.
11. ANY CHANGES, REVISIONS OR SUBSTITUTIONS TO THE PLANS, SPECIFICATIONS, MATERIALS, REQUIREMENTS OR WORK SHALL BE SUBMITTED TO THE VILLAGE ENGINEER, IN WRITING, WITH THEIR APPROVAL BY THE VILLAGE ENGINEER RECEIVED PRIOR TO BEGINNING SAID WORK. ALL MATERIALS AND CONSTRUCTION WHETHER IMPLICITLY OR EXPLICITLY STATED OR COVERED WITHIN THE REQUIREMENTS, CODES OR SPECIFICATIONS, SHALL BE APPROVED BY THE VILLAGE ENGINEER, PRIOR TO COMMENCING THE INSTALLATION AND CONSTRUCTION.
12. ALL OBSTRUCTIONS THAT ARE NOT APPROVED BY THE VILLAGE AND WHICH CURRENTLY EXIST IN THE RIGHT–OF–WAY SHALL BE REMOVED, WHICH INCLUDE ALL ROCKS AND BOULDERS.
13. ALL SEPTIC AND/OR WELL ABANDONMENTS SHALL BE IN ACCORDANCE WITH THE REQUIREMENT OF THE VILLAGE ENGINEER.
14. OSHA RULES, REGULATIONS AND REQUIREMENTS SHALL BE STRICTLY ADHERED TO DURING THE EXECUTION OF ALL WORK TO BE PERFORMED UNDER THE APPROVED DRAWINGS
15. TREE PROTECTION OF EXISTING TREES TO REMAIN SHALL BE DETERMINED BY PROJECT LANDSCAPE ARCHITECT. THE CONTRACTOR SHALL INSTALL TEMPORARY ORANGE FENCE AND OTHER MEASURES AS MAY BE SPECIFIED BY PROJECT LANDSCAPE ARCHITECT AROUND ALL TREES TO REMAIN AND WETLAND AREAS TO BE MITIGATED.
16. EXCAVATION AND GRADING:
   a. NO EQUIPMENT, MATERIALS, OR WORK SHALL BE PLACED OR PERFORMED OUTSIDE THE LIMITS OF THE PROJECT WITHOUT THE APPROVAL OF THE OWNER.
   b. ALL TOPSOIL WITHIN AREAS TO BE DISTURBED BY CONSTRUCTION SHALL BE STRIPPED FOR RE–USE AS NEW TOPSOIL OR AS BACKFILL. IT IS ANTICIPATED THAT THERE WILL BE EXCESS TOPSOIL. THE CONTRACTOR SHALL MAKE PROVISIONS TO PROPERLY DISPOSE OF THE MATERIAL AT A SUITABLE LOCATION.
   c. ALL DEBRIS AND SEDIMENT TRACKED ONTO PUBLIC ROADWAYS SHALL BE REMOVED DAILY OR AS DIRECTED BY THE VILLAGE.

CONTRACTOR'S NOTES

IT SHALL BE THE CONTRACTOR'S RESPONSIBILITY TO:

1. SECURE ANY AND ALL STATE, COUNTY OR CITY PERMITS REQUIRED AND PAY ALL FEES RELATED THERETO.
2. FURNISH ALL LABOR, MATERIAL, AND EQUIPMENT NECESSARY TO CONSTRUCT THE IMPROVEMENTS SHOWN ON THE PLANS. IF ANY QUANTITIES ARE IDENTIFIED, IT IS STRICTLY TO GIVE THE CONTRACTOR AN IDEA OF APPROXIMATE QUANTITIES AND TO PROVIDE THE ENGINEER OF A METHOD FOR ESTIMATING THE COST FOR BONDING PURPOSES.
3. REVIEW THE PLANS AND INFORM THE ENGINEER OF ANY ERROR IN THE PLANS THAT WILL CAUSE A PROBLEM DURING CONSTRUCTION AND/OR AFTER COMPLETION. FAILURE TO INFORM THE ENGINEER OF AN ERROR WILL MEAN THAT THE CONTRACTOR SHALL REPAIR ANY CONSTRUCTION AT HIS EXPENSE.
4. FIELD CHECK AND VERIFY ALL EXISTING UTILITY LOCATIONS, DIMENSIONS AND ELEVATIONS IN THE FIELD PRIOR TO THE COMMENCEMENT OF CONSTRUCTION OF THE IMPROVEMENTS OR PROPOSED WORK. ALL EXISTING UTILITY LOCATIONS ON THE PLANS HAVE BEEN SHOWN BASED ON BEST AVAILABLE INFORMATION. NOTIFY THE ENGINEER IMMEDIATELY IF DISCREPANCIES ARE FOUND. FIELD CONDITIONS DIFFERENT THAN SHOWN ON THE PLANS SHALL NOT BE USED AS A REASON FOR EXTRA COMPENSATION.
5. THE CONTRACTOR SHALL REFER TO MITIGATION OR LANDSCAPE PLANS FOR COMPLETE INFORMATION REGARDING PLANTING LOCATIONS, WETLANDS, WALKWAYS, WALLS, STREAM AND POND SHORELINES, IF APPLICABLE.
6. THE CONTRACTOR SHALL NOTIFY THE VILLAGE ENGINEER TWO (2) BUSINESS DAYS PRIOR TO THE START OF CONSTRUCTION. ALSO CONTACT J.U.L.I.E. 1–800–892–0123 OR DIGGER HOTLINE 1–312–744–7000 AT LEAST 48 HOURS PRIOR TO STARTING WORK. ALL OTHER AGENCIES SHALL BE NOTIFIED AS REQUIRED. IT SHALL ALSO BE THE RESPONSIBILITY OF THE CONTRACTOR TO CALL AT LEAST 48 HOURS IN ADVANCE AND SET UP THE NECESSARY AND PROPER INSPECTION(S) FOR ALL WORK TO BE PERFORMED.
7. IF EXISTING, FIELD TILE ARE ENCOUNTERED OR DAMAGED DURING CONSTRUCTION THE CONTRACTOR SHALL CONNECT IT TO THE NEAREST STORM SEWER OR REPAIR TILE. THE CITY, THE OWNER AND ENGINEER SHALL BE CONTACTED IF FIELD TILE ARE ENCOUNTERED AND NO REPAIR WORK OR REROUTING TO BE COMPLETED WITHOUT APPROVALS.
8. THE CONTRACTOR AND ENGINEER SHALL MAINTAIN RECORDS FOR 'AS BUILT' DRAWINGS WHICH SHALL BE SUBMITTED TO THE VILLAGE ENGINEER AT THE COMPLETION OF THIS PROJECT.
9. THE CONTRACTOR SHALL MAINTAIN AND KEEP AT THE JOB SITE, AN UP TO DATE SET OF 'RECORD DRAWINGS' SHOWING ALL CHANGES FROM THE ORIGINAL PLANS. THE LOCATION OF ALL SERVICE CONNECTIONS FOR SANITARY SEWER, STORM SEWER AND WATER SHALL BE SHOWN FROM THE CLOSEST MANHOLE OR VALVE VAULT. ALL B–BOXES AND CLEANOUTS MUST BE SHOWN WITH TIED DIMENSIONS. THE ELEVATION OF ALL RIMS AND INVERTS SHALL BE VERIFIED BY THE CONTRACTOR AND SHOWN ON THE 'RECORD DRAWINGS'. THE CONTRACTOR SHALL DELIVER THE 'RECORD DRAWINGS' TO THE ENGINEER AT THE CONCLUSION OF THE PROJECT, PRIOR TO ANY FINAL INSPECTIONS. THE ENGINEER WILL TRANSFER THE INFORMATION TO THE ORIGINAL PLANS BY INCORPORATING THE VILLAGE AS–BUILT REQUIREMENT LIST AND FURNISH THE VILLAGE/CITY/CO. THREE (3) SETS OF COMPLETE 'RECORD DRAWINGS,' AND, IF REQUIRED, ONE (1) SET OF REPRODUCIBLE MYLARS.
10. ALL DAMAGE TO EXISTING PAVEMENT TO REMAIN WHICH RESULTS FROM THE CONTRACTORS OPERATIONS SHALL BE REPLACED WITH LIKE MATERIALS AT THE CONTRACTORS EXPENSE.

GENERAL UNDERGROUND UTILITIES

1. WHEN PIPING IS UNDER OR WITHIN TWO FEET (2') OF EXISTING OR PROPOSED PAVEMENT TRENCH BACKFILL SHALL BE PROVIDED.
2. ALL MANHOLES AND SIMILAR STRUCTURES MUST BE A MINIMUM OF 48"DIAMETER, VALVE VAULTS MUST BE A MINIMUM OF 60"DIAMETER, UNLESS APPROVED OTHERWISE.
3. FOR MODIFICATION OR REPAIR OF ALL SEWERS; ADDITION OF, OR REPAIR OF, SEWER CLEAN OUTS, NON SHEAR COUPLINGS SHALL BE USED IN CONNECTION OF SEWER PIPES WITH PRIOR APPROVAL FROM VILLAGE ENGINEERING DEPARTMENT.
4. A MINIMUM TEN FEET (10') HORIZONTAL SEPARATION SHALL BE MAINTAINED BETWEEN WATERMAIN AND SEWER OR DRAIN LINES UNLESS PRECLUDED BY LOCAL CONDITIONS. WHEN THE WATERMAIN IS LOCATED CLOSER THAN TEN FEET (10') HORIZONTALLY OR THE INVERT OF THE WATERMAIN IS LOCATED CLOSER THAN EIGHTEEN INCHES (18") VERTICALLY ABOVE THE CROWN OF ANY SEWER OR DRAIN LINE, THEN: THE SEWER OR DRAIN LINE SHALL BE CONSTRUCTED OF PIPE EQUIVALENT TO WATERMAIN STANDARDS AND SHALL BE PRESSURE TESTED TO ASSURE WATER TIGHTNESS IN ACCORDANCE WITH THE ILLINOIS ENVIRONMENTAL PROTECTION AGENCY (I.E.P.A.) REQUIREMENTS.
5. IF THE WATERMAIN PASSES UNDER A SEWER OR DRAIN LINE, THE FOLLOWING CONDITIONS SHALL BE MET: A VERTICAL SEPARATION OF EIGHTEEN INCHES (18") BETWEEN THE INVERT OF THE SEWER OR DRAIN LINE AND THE CROWN OF THE WATERMAIN SHALL BE MAINTAINED WITH SUPPORT PROVIDED FOR THE SEWER OR DRAIN LINE(S) TO PREVENT ANY MOVING OR SETTLING, RUPTURE OR BREAKING, AND SEWER OR DRAIN LINE SHALL BE CONSTRUCTED AS DESCRIBED IN ITEM 4) ABOVE.
6. THE COST OF ALL REQUIRED TESTING OF UNDERGROUND UTILITIES SHALL BE INCIDENTAL TO THE CONSTRUCTION COST OF THE SAME.
7. THE CONTRACTOR SHALL MARK LOCATION OF THE ENDS, IF NECESSARY, OF ANY SANITARY, WATER, AND STORM SERVICES WITH BURIED 4'X 4'WOOD POSTS EXTENDING A MINIMUM OF THREE (3') FEET OUT OF THE GROUND AND PAINTED RED, BLUE, AND GREEN RESPECTIVELY, WITH APPROPRIATE SIGNS ATTACHED STATING 'CAUTION B–BOX DO NOT REMOVE UNTIL LANDSCAPING IS COMPLETE.'
8. ALL STORM, SANITARY AND WATERMAIN SERVICES TO END AT R.O.W. WITH PROPER TERMINATION FOR SUBDIVISION CONSTRUCTION.
9. WHEN CONNECTING TO AN EXISTING SEWER MAIN BY MEANS OTHER THAN AN EXISTING WYE, TEE, OR AN EXISTING MANHOLE, THE SEWER SHALL BE CIRCULAR SAW–CUT BY PROPER TOOLS ('SEWER–TAP' MACHINE OR SIMILAR) AND PROPER INSTALLATION OF HUB–WYE SADDLE OR HUB–TEE
10. SEWER CONNECTIONS TO AN EXISTING STRUCTURE SHALL BE MACHINE CORED.
11. A FLEXIBLE RUBBER BOOT SHALL BE USED AT ALL SANITARY SEWER MANHOLE PENETRATION CONNECTIONS.
12. ECCENTRIC CONE SECTIONS SHALL BE USED ON ALL MANHOLES, CATCH BASINS, VAULTS, ETC. UNLESS APPROVED OTHERWISE BY THE VILLAGE ENGINEER.
13. ALL SEWER CONSTRUCTION REQUIRES STONE BEDDING 1/4"TO 1"IN SIZE, (I.D.O.T. EQUIVALENT CA–11, CA–13) WITH A MINIMUM THICKNESS EQUAL TO 1/4 THE OUTSIDE DIAMETER OF THE SEWER PIPE, BUT NOT LESS THAN FOUR (4") INCHES, NOR GREATER THAN EIGHT (8") INCHES.
14. ALL SEWER CONSTRUCTION SHALL CONFORM TO THE APPROVED PERMIT PLANS UNLESS REVISIONS HAVE BEEN APPROVED BY THE VILLAGE, AS WELL AS ANY AND ALL OTHER NECESSARY AGENCIES.
15. STRUCTURES SHALL HAVE A MAXIMUM OF TWELVE INCHES (12') OF ADJUSTMENT WITH ANY COMBINATION UP TO A MAXIMUM OF THREE (3) RINGS.
16. PROTECT AND/OR COVER ALL PIPES AND UNDERGROUND STRUCTURES UNTIL FINAL GRADING, PAVING AND LANDSCAPING ARE COMPLETE.
17. THE 10–POINT SOIL EVALUATION PROCEDURE FOR DUCTILE IRON PIPE CONFORMING TO APPENDIX A OF THE ANSI/AWWA C105/A21.5 STANDARD SHALL BE USED TO DETERMINE THE CORROSIVITY OF THE SOILS ON A PER PROJECT BASIS AND WHETHER OR NOT POLYETHYLENE WRAP IS REQUIRED FOR CORROSION PROTECTION. IF CORROSION PROTECTION IS REQUIRED, THE WATER MAIN SHALL BE WRAPPED WITH POLYETHYLENE WRAP IN ACCORDANCE WITH ANSI/AWWA C105/A21.5.

STORM SEWER

1. THE STORM SEWER PIPE AND STRUCTURES SHALL BE CONSTRUCTED IN ACCORDANCE WITH STANDARD SPECIFICATIONS, THE PLANS, AND THE DETAILS, EXCEPT AS MODIFIED HERE–IN.
   a. INLET FILTER BASKETS SHALL BE PROVIDED FOR ALL OPEN LID STORM STRUCTURES IMPACTED BY CONSTRUCTION.
   b. RIM ELEVATIONS GIVEN ON THE PLANS ARE ONLY TO ASSIST THE CONTRACTOR IN DETERMINING THE APPROXIMATE OVERALL HEIGHT OF THE STRUCTURE. FRAMES ON ALL STRUCTURES SHALL BE ADJUSTED TO THE FINAL ELEVATION OF THE AREA IN WHICH THEY ARE LOCATED AS PART OF THE STRUCTURE.
   c. PIPE IDENTIFIED AS RCP SHALL BE REINFORCED CONCRETE PIPE, CLASS IV WITH O–RING JOINTS. ALL OTHER STORM PIPE MAY BE MEETING ASASHTO M–278 OR ASTM F679.
2. ELEVATIONS OF FLARED END SECTIONS SHALL BE INTERPRETED AT THE INVERT OF THE FLARED END SECTION.
3. RIM GRADES FOR STORM SEWER STRUCTURES LOCATED WITHIN THE CURB AND GUTTER ARE FLOW LINE ELEVATIONS.
4. ALL SUMP PUMP DRAIN TILE DISCHARGES SHALL BE ROUTED TO THE STORM SEWER SYSTEM. SUMP PUMP SERVICE CONNECTIONS SHALL BE FOUR (4") INCH PVC SDR 26 CONFORMING TO ASTM D2751 OR ASTM D3034 AT A MINIMUM SLOPE OF 1.6% AND SHALL BE AIR GAPPED. MINIMUM COVER SHALL BE TWO (2') FEET, WHEREVER POSSIBLE.
5. ALL DOWNSPOUTS, FOOTING DRAINS, AND OUTSIDE DRAINS SHALL DISCHARGE TO THE STORM SEWER OR OVER GROUND AS APPROVED BY THE VILLAGE ENGINEER.
6. MINIMUM DIAMETER OF STORM SEWER SHALL BE TWELVE (12") INCHES UNLESS APPROVED OTHERWISE.
7. NO STORM WATER SHALL BE DISCHARGED TO THE SANITARY SEWER SYSTEM.

WATER MAIN

1. ALL WATER MAINS SHALL BE PRESSURE TESTED PER REQUIREMENTS OF THE VILLAGE. METHOD SHALL BE A LEAKAGE TEST OF 150 P.S.I. HELD FOR 2 HOURS. 250 P.S.I. ON FIRE SUPPRESSION LINE.
2. PIPE TO BE CEMENT LINED PER ANSI A21.4 (AWWA C104).
3. THE MINIMUM COVER FOR WATER MAINS SHALL BE 5.5 FEET FROM FINISHED GRADE TO TOP OF MAIN (SIX (6') FOOT MAX. UNLESS APPROVED OTHERWISE BY THE VILLAGE ENGINEER.)
4. ALL WATER MAINS AND WATER SERVICES SHALL BE INSTALLED PER THE VILLAGE STANDARD.
5. WATER SERVICE AND FIRE SUPPRESSION SYSTEMS SHALL BE MADE AND INSTALLED BY A LICENSED PLUMBER, IN ACCORDANCE WITH THE ILLINOIS STATE PLUMBING CODE.
6. FIRE SPRINKLER LINES, WATER MAINS, WATER MAINS THAT HAVE BEEN DEPRESSURIZED, AND WATER LINES MUST BE PRESSURE TESTED AND CHLORINATED FROM THE POINT OF CONNECTION AT THE EXISTING WATER MAIN TO THE VALVE INSIDE THE BUILDING PER THE REQUIREMENTS OF THE VILLAGE/CITY/CO. AND STANDARD SPECIFICATIONS FOR WATER AND SEWER MAIN CONSTRUCTION IN ILLINOIS. CONTACT VILLAGE PUBLIC WORKS UTILITY DIVISION AT LEAST 48 HOURS PRIOR TO TAP AND INSPECTIONS.
7. ALL B–BOXES SHALL BE 1–1/2"MUELLER OR FORD TELESCOPIC B–BOX WITH 'WATER'IMPRINTED ON THE LID OF THE BOX AND A BRASS PENTAGON PLUG.
8. ALL FASTENER HARDWARE (I.E., NUTS, BOLTS AND WASHERS) ASSOCIATED WITH FITTINGS SHALL BE STAINLESS STEEL.
9. ALL FITTINGS SHALL BE RESTRAINED BY THRUST RESISTANT WEDGE, RETAINER GLANDS, MANUFACTURED WITH TORQUE LIMITING TWIST OFF NUTS.
10. TAPPING CONNECTIONS TO THE VILLAGE WATER SYSTEM SHALL BE MADE UNDER FULL WATER SERVICE PRESSURES. PRESSURE CONNECTIONS SHALL BE MADE USING A FULL BODY DUCTILE IRON TAPPING SLEEVE (MATERIAL TO BE DETERMINED BY VILLAGE) AND VALVE WITH 60" VAULT.

SANITARY SEWER

1. ALL INTERIOR FLOOR DRAINS SHALL BE DIRECTED TO DISCHARGE TO THE SANITARY SEWER.
2. DROP MANHOLE SECTIONS SHALL BE PRECAST UNITS HAVING DROP ASSEMBLY OF 8 INCHES FOR PIPES 12 INCHES AND LESS AND TWO NOMINAL DIAMETER SIZES LESS THAN THE INCOMING PIPE FOR PIPES 15 INCHES OR LARGER.
3. PER ILLINOIS STATE STANDARDS "DEFLECTION OF POLYVINYL CHLORIDE (PVC) PIPE SHALL NOT EXCEED 5.0% OF THE 'BASE I.D.' (INTERNAL DIAMETER) OF THE PIPE. 'BASE I.D.' SHALL BE CALCULATED IN ACCORDANCE WITH THE FOLLOWING:

   AVD ID = AVG OD – 2(1.06)T

   TOLERANCE PACKAGE = (A^2 + B^2 + C^2)^(1/2)

   WHERE:

   A = OD TOLERANCE (ASTM D3034)

   B = EXCESS WALL THICKNESS TOLERANCE = 0.6T

   C = OUT–OF–ROUNDNESS TOLERANCE = 0.015 (AVG OD)

   T = MINIMUM WALL THICKNESS (ASTM D3034)

   BASE ID = AVG ID – TOLERANCE PACKAGE

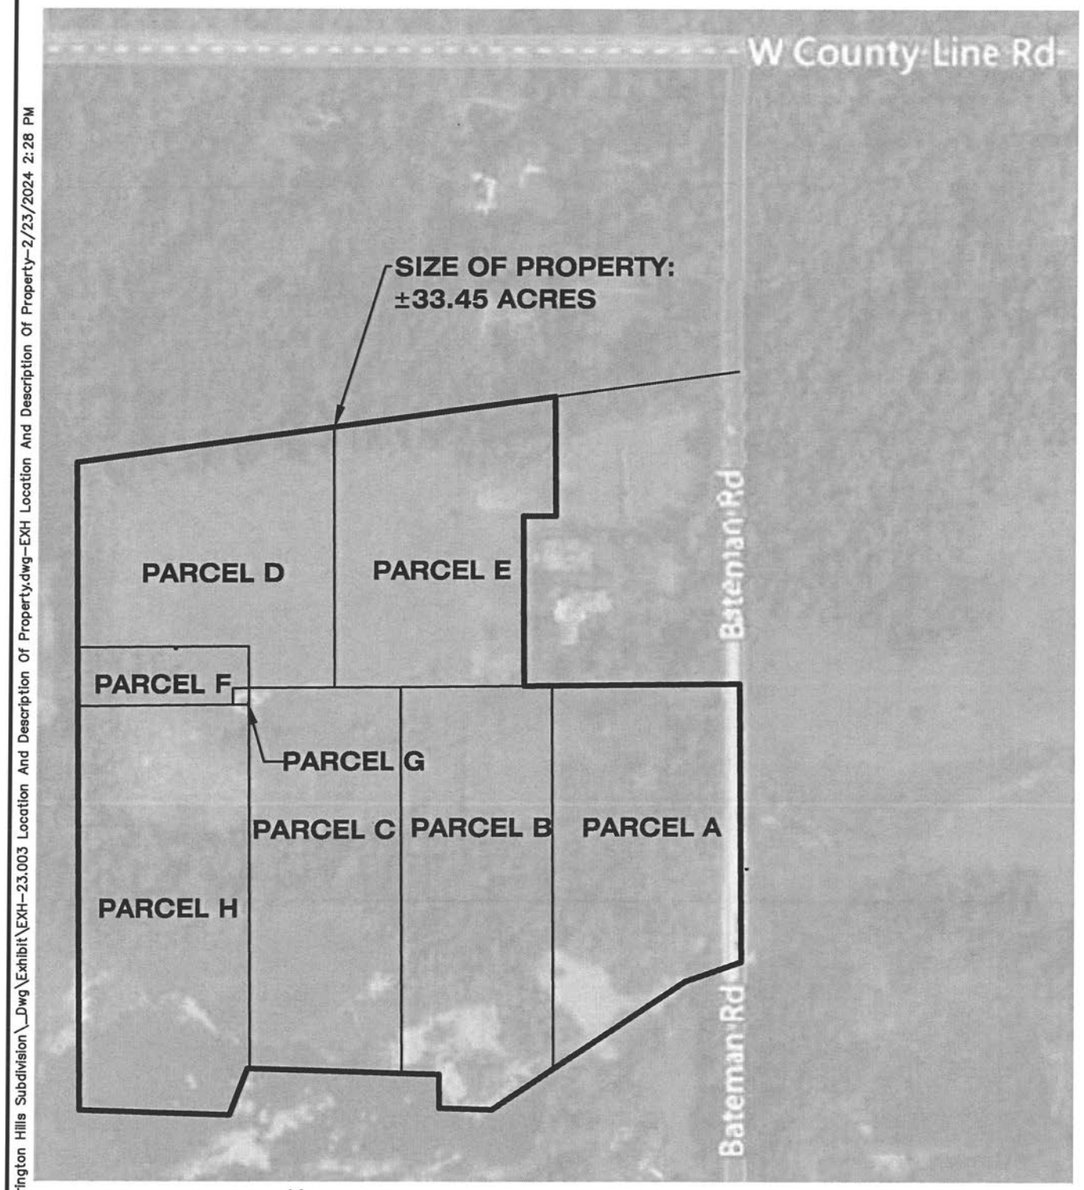
   DEFLECTION OF COMPOSITE PIPE ("TRUSS" PIPE) SHALL NOT EXCEED 3.0% OF THE AVERAGE INSIDE DIAMETER (ID) OF THE PIPE IN ACCORDANCE WITH ASTM D2680. THE PIPE LINE SHALL BE TESTED FOR EXCESS DEFLECTING BY PULLING A "GO–NO GO" MANDREL THROUGH THE PIPE FROM MANHOLE TO MANHOLE. THE MANDREL SHALL BE SIZED IN ACCORDANCE WITH SECTION 31–1.11C (4), AND AS SPECIFIED IN THE SPECIAL PROVISIONS. A "DEFLECTOMETER" MAY ALSO BE USED TO CHECK AND RECORD DEFLECTION. WHENEVER POSSIBLE AND PRACTICAL, THE TESTING SHALL INITIATE AT THE DOWNSTREAM LINES AND PROCEED TOWARDS THE UPSTREAM LINES. WHERE THE DEFLECTION IS FOUND TO BE IN EXCESS OF ALLOWABLE TESTING LIMITS, THE CONTRACTOR SHALL EXCAVATE TO THE POINT OF EXCESS DEFLECTION AND CAREFULLY COMPACT AROUND THE POINT WHERE EXCESS DEFLECTION WAS FOUND. THE LINE SHALL THEN BE RETESTED FOR DEFLECTION. HOWEVER, SHOULD AFTER THE INITIAL TESTING THE DEFLECTED PIPE FAIL TO RETURN THE ORIGINAL SIZE (INSIDE DIAMETER) THE LINE SHALL BE REPLACED."
4. AIR TESTING OR INFILTRATION TESTING SHALL BE PERFORMED ON ALL NEW SANITARY SEWERS PER THE "STANDARD SPECIFICATIONS FOR WATER AND SEWER MAIN CONSTRUCTION IN ILLINOIS," SECTION 31–1.11, "INFILTRATION LEAKAGE SHALL NOT EXCEED 100 GALLONS PER DAY PER INCH DIAMETER PER MILE INCLUDING MANHOLES AND SERVICE CONNECTIONS."
5. ALL SANITARY MANHOLE COVERS SHALL BE IMPRINTED "SANITARY" AND MANHOLES IN PAVED AREAS SHALL HAVE HEAVY DUTY TYPE COVERS WITH CONCEALED PICK HOLES. ALL FRAMES AND LIDS FOR SANITARY MANHOLES SHALL CONFORM TO ASTM A48 (NEENAH R–1077–B OR EQUAL MEETS THIS REQUIREMENT).
6. A RESILIENT FLEXIBLE JOINT SHALL BE INSTALLED AT PENETRATION POINTS OF MANHOLE STRUCTURES OF A DESIGN APPROVED BY THE MUNICIPAL ENGINEER. THE FLEXIBLE JOINT MAY CONSIST OF A SLEEVE OF A HIGH QUALITY SYNTHETIC RUBBER WITH A FLANGE WHICH IS CAST DIRECTLY INTO THE WALL OF THE MANHOLE BASE TO FORM A WATER STOP SEAL AND EXTENDS BEYOND THE MANHOLE WALL TO CONNECT WITH THE PIPING ENTERING/EXITING THE MANHOLE THIS JOINT SHALL MEET ASTM–923.
7. ALL MANHOLES SHALL BE TESTED FOR INFILTRATION/EXFILTRATION IN ACCORDANCE WITH ASTM C969–94.
8. ALL MANHOLES SHALL BE VACUUM TESTED TO STATE STANDARD SPECIFICATIONS.
9. PROVISION SHALL BE MADE WHEN SANITARY PIPE HAS MORE THAN 15 FEET OF COVER TO BE CONSTRUCTED OF MATERIAL THAT CAN WITHSTAND THE PRESSURE AT INDICATED DEPTHS.

EARTHWORK / EROSION & SEDIMENTATION CONTROL

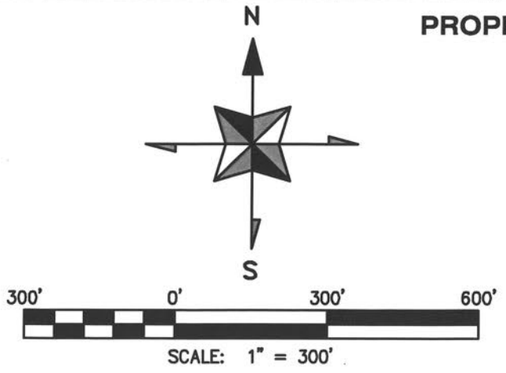
1. ALL CONSTRUCTION ACTIVITIES THAT INVOLVE EARTHWORK SHALL MEET THE NATIONAL POLLUTANT DISCHARGE ELIMINATION SYSTEM PHASE II REQUIREMENTS:
   a. SUBMITTAL OF A NOTICE OF INTENT (NOI) TO IEPA.
   b. POSSESSION OF A COMPLETED AND SIGNED STORMWATER POLLUTION PREVENTION PLAN (SWPPP) AND A GRAPHIC EROSION AND SEDIMENT CONTROL (ESC) PLAN.
   c. IMPLEMENTATION OF THE SWPPP.
   d. SUBMITTAL OF AN INCIDENCE OF NONCOMPLIANCE (ION) IF AN EVENT OCCURS.
   e. WEEKLY REPORTS AFTER ½"RAINFALL OR 5"SNOWFALL.
   f. DOCUMENTATION OF CHANGES TO ESC PLAN.
   g. SUBMITTAL OF A NOTICE OF TERMINATION (NOT) WHEN FINAL STABILIZATION IS ACHIEVED.
2. ANY WETLAND MITIGATION SHALL BEGIN PRIOR TO ANY GRADING WORK AND SHALL BE IN ACCORDANCE WITH THE APPROVED MITIGATION PERMIT PLAN AND REQUIREMENTS.
3. IN ORDER TO PROTECT AND ENSURE AGAINST FLOODING, ALL TOP OF FOUNDATIONS SHALL BE SET A MINIMUM OF ONE (1') FOOT ABOVE THE HIGH WATER LEVEL OF ADJACENT STORMWATER MANAGEMENT FACILITIES SUCH AS RETENTION/DETENTION PONDS.
4. THE CONTRACTOR SHALL MAINTAIN EXISTING POSITIVE DRAINAGE FROM OFF–SITE AT ALL TIMES DURING CONSTRUCTION.
5. WITHIN THE LIMITS OF PROPOSED GRADING THE SOIL SHALL BE COMPACTED TO NOT LESS THAN THE FOLLOWING PERCENTAGES OF MODIFIED PROCTOR DRY DENSITY IN ACCORDANCE WITH ASTM D 1557–78:
   a. UNDER STRUCTURES, BUILDING SLABS, STEPS AND PAVEMENTS. COMPACT SIX (6") INCH MAXIMUM LIFTS OF SUBGRADE. BACKFILL OR FILL MATERIAL AT 95% MODIFIED PROCTOR DRY DENSITY.
   b. UNDER WALKWAYS. COMPACT SIX (6") INCH MAXIMUM LIFTS OF DRY SUBGRADE, BACKFILL OR FILL MATERIAL AT 95% MODIFIED PROCTOR DRY DENSITY.
   c. UNDER LAWN OR UNPAVED AREAS. COMPACT SIX (6") INCH MAXIMUM LIFTS OF SUBGRADE, BACKFILL OR FILL MATERIAL AT 85% MODIFIED PROCTOR DRY DENSITY.
6. ALL EROSION CONTROL WORK SHALL COMPLY WITH ILLINOIS PROCEDURES AND STANDARDS FOR URBAN SOIL EROSION AND SEDIMENTATION CONTROL. THE CONTRACTOR SHALL PLACE EROSION CONTROL AND SEDIMENTATION DEVICES AS REQUIRED BY THE EROSION SPECIFICATIONS AND AS DIRECTED BY THE CITY.
7. STRIPPING OF VEGETATION, GRADING OR OTHER SOIL DISTURBANCE, ESPECIALLY IN DESIGNATED WETLAND AREAS, SHALL BE DONE IN A MANNER WHICH WILL MINIMIZE SOIL EROSION, AND SHALL BE IN ACCORDANCE WITH THE APPROVED DRAWINGS, MITIGATION AND PERMIT REQUIREMENTS.
8. THE CONTRACTOR SHALL TAKE PRECAUTIONARY MEASURES TO MINIMIZE EARTHWORK IN AREAS WHERE TREES ARE TO BE SAVED AS SHOWN ON THE PLANS OR DETERMINED IN THE FIELD.
9. THE EXTENT OF THE AREA WHICH IS EXPOSED AND FREE OF VEGETATION AND THE DURATION OF ITS EXPOSURE SHALL BE KEPT WITHIN PRACTICAL LIMITS AS DIRECTED BY THE VILLAGE ENGINEER.
10. SEDIMENTATION SHALL BE RETAINED ON SITE. SEDIMENT FENCE SHALL BE INSTALLED ALONG THE PERIMETER OF ALL REGRADED AREAS OR AS REQUIRED TO PREVENT SEDIMENT FROM ENTERING AND/OR LEAVING THE SITE.
11. DUST PRODUCED FROM THE SITE SHALL BE KEPT TO A MINIMUM DURING DRY PERIODS BY SPRAYING WATER AS REQUIRED TO THE VILLAGE ENGINEER'S SATISFACTION AND IS TO BE CONSIDERED INCIDENTAL.
12. ALL MUD SHALL BE REMOVED FROM ALL TIRES BEFORE LEAVING THE SITE AND THE ROADS SHALL BE KEPT CLEAN AND CLEAR OF MUD AND DEBRIS AT ALL TIMES.
13. CULVERTS AND DRAINAGE DITCHES SHALL BE KEPT CLEAN AND CLEAR OF OBSTRUCTIONS DURING THE CONSTRUCTION PERIOD.
14. SILT FENCE SHALL BE INSPECTED FREQUENTLY AND MAINTAINED OR REPLACED AS REQUIRED TO MAINTAIN BOTH EFFECTIVENESS AND INTEGRITY.
15. WATER COURSES AND DRAINAGE SWALES ADJACENT TO CONSTRUCTION ACTIVITIES SHALL BE MONITORED AS NECESSARY, FOR EVIDENCE OF SILT INTRUSION AND OTHER ADVERSE ENVIRONMENTAL IMPACTS. ANY PROBLEMS OR DEFICIENCIES SHALL BE CORRECTED IMMEDIATELY UPON THEIR DISCOVERY.
16. SEED ALL UNPAVED AREAS OF PARKWAYS, RIGHT–OF–WAYS AND FRONT YARDS TO REAR WALL OF THE BUILDING. ANY AND ALL OTHER SITE SEEDING MAY BE USED, IN SOME INSTANCE PARTICULARLY FOR THE BACK YARD, ONLY WITH PRIOR APPROVAL BY THE VILLAGE ENGINEER.
17. THE CONTRACTOR SHALL INSTALL ALL EROSION CONTROL ITEMS PRIOR TO COMMENCEMENT OF ANY WORK.

PAVING

1. BASE COURSE SHALL BE AGGREGATE BASE COURSE, TYPE B (CRUSHED LIMESTONE, GRADE B), CONFORMING TO THE STANDARD SPECIFICATIONS (SEE PLANS FOR THICKNESS).
2. SURFACE COURSE AND BINDER COURSE SHALL BE BITUMINOUS CONCRETE, CLASS I HOT MIX (SEE PLANS FOR THICKNESS).
3. CURB AND GUTTER, BARRIER CURB AND SIDEWALK SHALL BE PORTLAND CEMENT CONCRETE WITH AIR ENTRAINMENT OF 5% ± 1% A SIX (6) BAG MIX SHALL BE USED. MAXIMUM ALLOWABLE SLUMP IS THREE (3") INCHES. CURING COMPOUND SHALL BE APPLIED AFTER FINISHING. CURB BACKFILL SHALL BE INCIDENTAL TO THE CONSTRUCTION OF THE CURB. LOCATIONS OF WATER AND SEWER SERVICE LINES SHALL BE CLEARLY MARKED ON ALL NEW CURBS.
4. A 3/4 INCH FIBER EXPANSION JOINT SHALL BE INSTALLED WHEN THE CURB ABUTS A SIDEWALK OR EXISTING CURB OR CONCRETE SIDEWALK/PAVEMENT ABUTS A BUILDING, OR CONCRETE PAVEMENT/SIDEWALK ABUTS EXISTING SIDEWALK.
5. CURB AND GUTTER AND BARRIER CURB SHALL HAVE SAWED CONTRACTION JOINTS (MIN 2") AT MAXIMUM INTERVALS OF TWENTY FEET (20') AND 3/4 INCH FIBER EXPANSION JOINT AT MAXIMUM INTERVALS OF SIXTY (60') FEET.
6. SUBGRADE SHALL BE FINISHED TO ± 0.1 FOOT OF DESIGN SUBGRADE ELEVATIONS BY THE EARTHWORK CONTRACTOR. FINE GRADING FOR PAVEMENTS AND SIDEWALKS SHALL BE THE RESPONSIBILITY OF THE PAVING CONTRACTOR.
7. THE BASE COURSE SHALL BE PRIMED AT THE RATE OF 0.25 TO 0.50 GALLONS PER SQUARE YARD WITH A LIQUID ASPHALT CONFORMING TO I.D.O.T. STANDARDS AND SHALL BE APPROPRIATE FOR PREVAILING WEATHER CONDITIONS. PRIME COAT AND CLEANING OF THE EXISTING SURFACE SHALL BE CONSIDERED AS INCIDENTAL TO THE CONTRACT WORK.
8. PRIOR TO PLACEMENT OF ANY PAVEMENT INCLUDING CURBS, THE SUBGRADE SHALL BE PROOF ROLLED WITH A FULLY LOADED TANDEM AXLE DUMP TRUCK (MINIMUM 20 TONS). PROOF ROLLING SHALL BE WITNESSED BY THE MATERIALS CONSULTANT AND THE VILLAGE ENGINEER. PROOF ROLLING SHALL ALSO BE REQUIRED ON THE BASE MATERIAL AS WELL. THE DENSITY OF THE SUBGRADE BASE AND BASE MATERIAL AS WELL AS THE BITUMINOUS MATERIAL SHALL ALSO BE TESTED BY THE MATERIALS CONSULTANT. THE TEST RESULTS SHALL BE PROVIDED TO THE VILLAGE ENGINEER FOR HIS USE IN DETERMINING THE ADEQUACY OF THE PAVEMENT DESIGN.
9. ALL STRUCTURES SUCH AS MANHOLES, VALVE BOXES, ETC. SHALL BE ADJUSTED TO MEET THE NEW SURFACE ELEVATION. FURTHERMORE, STRUCTURES SUCH AS MANHOLES, VALVE BOXES, ETC. THAT LIE WITHIN PORTLAND CEMENT CONCRETE SLAB AREAS (I.E., DRIVEWAYS, ETC.) SHALL BE BOXED OUT BY MEANS OF A



PROPERTY LOCATION



LEGAL DESCRIPTION :

PARCEL A:

THAT PART OF THE WEST HALF OF THE NORTHEAST QUARTER OF SECTION 6, TOWNSHIP 42 NORTH, RANGE 9, EAST OF THE THIRD PRINCIPAL MERIDIAN, DESCRIBED AS FOLLOWS: BEGINNING ON THE EAST LINE OF THE WEST HALF OF SAID NORTH EAST QUARTER AT A POINT 1029.98 FEET NORTH OF THE SOUTH LINE OF SAID NORTHEAST QUARTER (AS MEASURED ALONG THE EAST LINE OF SAID WEST HALF): THENCE CONTINUING NORTH ALONG THE EAST LINE OF SAID WEST HALF 550.00 FEET: THENCE WEST AT RIGHT ANGLES TO THE LAST DESCRIBED LINE, 373.00 FEET; THENCE SOUTH
00 DEGREES, 03 MINUTES, 00 SECONDS WEST ALONG A LINE PARALLEL WITH, THE EAST LINE OF THE SAID WEST HALF 759.00 FEET: THENCE NORTH 56 DEGREES, 48 MINUTES, 32 SECONDS EAST 311.67 FEET; THENCE NORTH 71 DEGREES, 17 MINUTES, 18 SECONDS EAST 118.63 FEET TO THE PLACE OF BEGINNING, All IN COOK COUNTY, ILLINOIS.

PARCEL B:

THAT PART OF THE WEST HALF OF THE NORTHEAST QUARTER Of SECTION 6, TOWNSHIP 42 NORTH, RANGE 9, EAST OF THE THIRD PRINCIPAL MERIDIAN, DESCRIBED AS FOLLOWS: COMMENCING AT A POINT ON THE EAST LINE OF THE WEST HALF OF SAID NORTHEAST QUARTER AND SAID POINT BEING 1579.98 FEET NORTH OF THE SOUTH LINE OF SAID NORTHEAST QUARTER (AS MEASURED ALONG THE EAST LINE OF SAID WEST HALF) THENCE WEST (AT RIGHT ANGLE TO THE LAST DESCRIBED LINE) 373.00 FEET TO THE PLACE OF BEGINNING; THENCE CONTINUING WEST ALONG THE LAST DESCRIBED LINE 300.00 FEET; THENCE SOUTH 00 DEGREES, 03 MINUTES WEST ALONG A LINE PARALLEL WITH THE EAST LINE OF SAID WEST HALF 765.02 FEET: THENCE SOUTH 87 DEGREES 44 MINUTES 30 SECONDS EAST 74.26 FEET; THENCE SOUTH 00 DEGREES 03 MINUTES WEST 66.72 FEET; THENCE SOUTH 87 DEGREES 44 MINUTES 30 SECONDS EAST 104.39 FEET: THENCE NORTH 58 DEGREES 48 MINUTES 32 SECONDS EAST 145.25 FEET; THENCE NORTH 00 DEGREES 03 MINUTES EAST PARALLEL WIT11 THE EAST LINE OF SAID WEST HALF 759.00 FEET TO THE PLACE OF BEGINNING.

PARCEL C:

THAT PART OF THE WEST HALF OF THE NORTHEAST QUARTER OF SECTION 6, TOWNSHIP 42 NORTH,, RANGE 9, EAST OF THE THIRD PRINCIPAL MERIDIAN, DESCRIBED AS FOLLOWS: COMMENCING AT A POINT ON THE EAST LINE OF THE WEST HALF OF SAID NORTHEAST QUARTER AND SAID POINT BEING 1579.98 FEET NORTH OF THE SOUTH LINE OF SAID NORTHEAST QUARTER (AS MEASURED ALONG THE EAST LINE OF SAID WEST HALF); THENCE WEST AT RIGHT ANGLES TO THE LAST DESCRIBED LINE 673.00 FEET TO THE PLACE OF BEGINNING; THENCE CONTINUING WEST ALONG THE LAS DESCRIBED LINE 300.00 FEET; THENCE SOUTH 00 DEGREES, 03 MINUTES WEST ALONG A LINE PARALLEL WITH THE EAST LINE OF SAID WEST HALF 753.45 FEET; THENCE SOUTH 87 DEGREES 44 MINUTES 30 SECONDS EAST 300.23 FEET; THENCE NORTH 00 DEGREES. 03 MINUTES EAST PARALLEL WITH THE EAST LINE OF SAID WEST HALF 765.02 FEET TO THE PLACE OF BEGINNING.

PARCEL D:

THAT PART OF THE WEST HALF OF THE NORTHEAST QUARTER OF SECTION 6,TOWNSHIP 42 NORTH, RANGE 9, EAST OF THE THIRD PRINCIPAL MERIDIAN, DESCRIBED AS FOLLOWS: COMMENCING ON A POINT ON THE EAST LINE OF THE WEST HALF OF SAID NORTHEAST QUARTER AND SAID POINT BEING 1579.98 FEET NORTH OF THE SOUTH LINE OF SAID NORTHEAST QUARTER (AS MEASURED ALONG THE EAST LINE OF SAID WEST HALF); THENCE WEST (AT RIGHT ANGLE TO THE LAST DESCRIBED LINE) 804.22 FEET TO THE PLACE OF BEGINNING; THENCE NORTH 00 DEGREES 03 MINUTES EAST ALONG A LINE PARALLEL WITH THE EAST LINE OF SAID WEST HALF, 515.26 FEET; THENCE SOUTH 82 DEGREES 41 MINUTES 34 SECONDS WEST, 514.80 FEET TO THE WEST LINE OF THE NORTHEAST QUARTER OF SAID SECTION 6; THENCE SOUTH 00 DEGREES 01 MINUTES 02 SECONDS EAST, 366.59 FEET; THENCE SOUTH 89 DEGREES 57 MINUTES EAST, 341.35 FEET; THENCE SOUTH 00 DEGREES 03 MINUTES WEST, 82.75 FEET; THENCE SOUTH, 89 DEGREES 57 MINUTES EAST, 168.78 FEET MORE OR LESS, TO THE PLACE Of BEGINNING, ALL IN COOK COUNTY. ILLINOIS.

PARCEL E:

THAT PART OF THE WEST HALF OF THE NORTHEAST QUARTER OF SECTION 6, TOWNSHIP 42 NORTH, RANGE 9, EAST OF THE THIRD PRINCIPAL MERIDIAN, DESCRIBED AS FOLLOWS: COMMENCING AT A POINT ON THE EAST LINE OF THE WEST HALF OF SAID NORTHEAST QUARTER AND SAID POINT BEING 1579.98 FEET NORTH OF THE SOUTH LINE OF SAID NORTHEAST QUARTER (AS MEASURED ALONG THE EAST LINE OF SAID WEST HALF): THENCE WEST (AT A RIGHT ANGLE TO THE LAST DESCRIBED LINE) 428.00 FEET TO THE PLACE OF BEGINNING; THENCE NORTH 00 DEGREES 03 MINUTES EAST ALONG A LINE PARALLEL WITH THE EAST LINE OF SAID WEST HALF, 336.26 FEET;THENCE SOUTH 89 DEGREES 57 MINUTES EAST, 64.30 FEET; THENCE NORTH 00 DEGREES 03 MINUTES EAST, 235.88 FEET; THENCE SOUTH 82 DEGREES 41 MINUTES 34 SECONDS WEST, 444.18 FEET; THENCE SOUTH 00 DEGREES 03 MINUTES WEST, 515.26 FEET: THENCE SOUTH 89 DEGREES 57 MINUTES EAST, 376.22 FEET, MORE OR LESS, TO THE PLACE Of BEGINNING, ALL IN COOK COUNTY, ILLINOIS.

PARCEL F:

THAT PART OF THE WEST HALF OF THE NORTHEAST QUARTER OF SECTION 6,TOWNSHIP 42 NORTH, RANGE 9 EAST OF THE THIRD PRINCIPAL MERIDIAN DESCRIBED AS FOLLOWS: COMMENCING AT A POINT ON THE EAST LINE OF THE WEST HALF OF SAID NORTHEAST QUARTER AND SAID POINT BEING 1579.98 FEET NORTH OF THE SOUTH LINE OF SAID NORTHEAST QUARTER (AS MEASURED ALONG EAST LINE OF SAID WEST HALF); THENCE WEST (AT A RIGHT ANGLES TO THE LAST DESCRIBED LINE) 973.00 FEET TO THE PLACE OF BEGINNING; THENCE NORTH 00 DEGREES 03 MINUTES EAST ALONG A LINE PARALLEL WITH THE EAST LINE OF SAID WEST HALF 82.75 FEET; THENCE NORTH 89 DEGREES 57 MINUTES 00 SECONDS WEST, 341.35 FEET TO THE WEST LINE OF THE NORTHEAST QUARTER OF SAID SECTION 6; THENCE SOUTH 00 DEGREES 01 MINUTES 02 SECONDS EAST ALONG THE WEST LINE OF THE NORTHEAST QUARTER OF SAID SECTION 6, 115.75 FEET; THENCE SOUTH 89 DEGREES 57 MINUTES EAST, 310.00 FEET; THENCE NORTH 00 DEGREES 03 MINUTES EAST, 33.00 FEET; THENCE SOUTH 89 DEGREES 57 MINUTES EAST, 31.22 FEET, MORE OR LESS, TO THE PLACE OF BEGINNING, ALL IN COOK COUNTY, ILLINOIS.

PARCEL G:

THAT PART OF THE WEST HALF OF THE NORTHEAST QUARTER OF SECTION 6, TOWNSHIP 42 NORTH, RANGE 9, EAST OF THE THIRD PRINCIPAL MERIDIAN, DESCRIBED AS FOLLOWS: COMMENCING AT A POINT ON THE EAST LINE OF THE WEST HALF OF SAID NORTHEAST QUARTER AND SAID POINT BEING 1579.98 FEET NORTH OF THE SOUTH LINE OF SAID NORTHEAST QUARTER (AS MEASURED ALONG THE EAST LINE OF SAID WEST HALF); THENCE WEST (AT A RIGHT ANGLE TO THE LAST DESCRIBED LINE), 973.00 FEET TO THE PLACE OF BEGINNING; THENCE SOUTH 00 DEGREES 03 MINUTES WEST ALONG A LINE PARALLEL WITH THE EAST LINE OF SAID WEST HALF 33.00 FEET: THENCE NORTH 89 DEGREES 57 MINUTES 00 SECONDS WEST 31.22 FEET, MORE OR LESS, TO A POINT THAT IS 310.00 FEET EAST OF THE WEST LINE OF SAID QUARTER SECTION; THENCE NORTH 00 DEGREES 03 MINUTES EAST, PARALLEL WITH THE EAST LINE OF SAID WEST HALF, 33.00 FEET; THENCE SOUTH 89 DEGREES 57 MINUTES EAST, 31.22 FEET, MORE OR LESS, TO THE PLACE OF BEGINNING, IN COOK COUNTY, ILLINOIS.

PARCEL H:

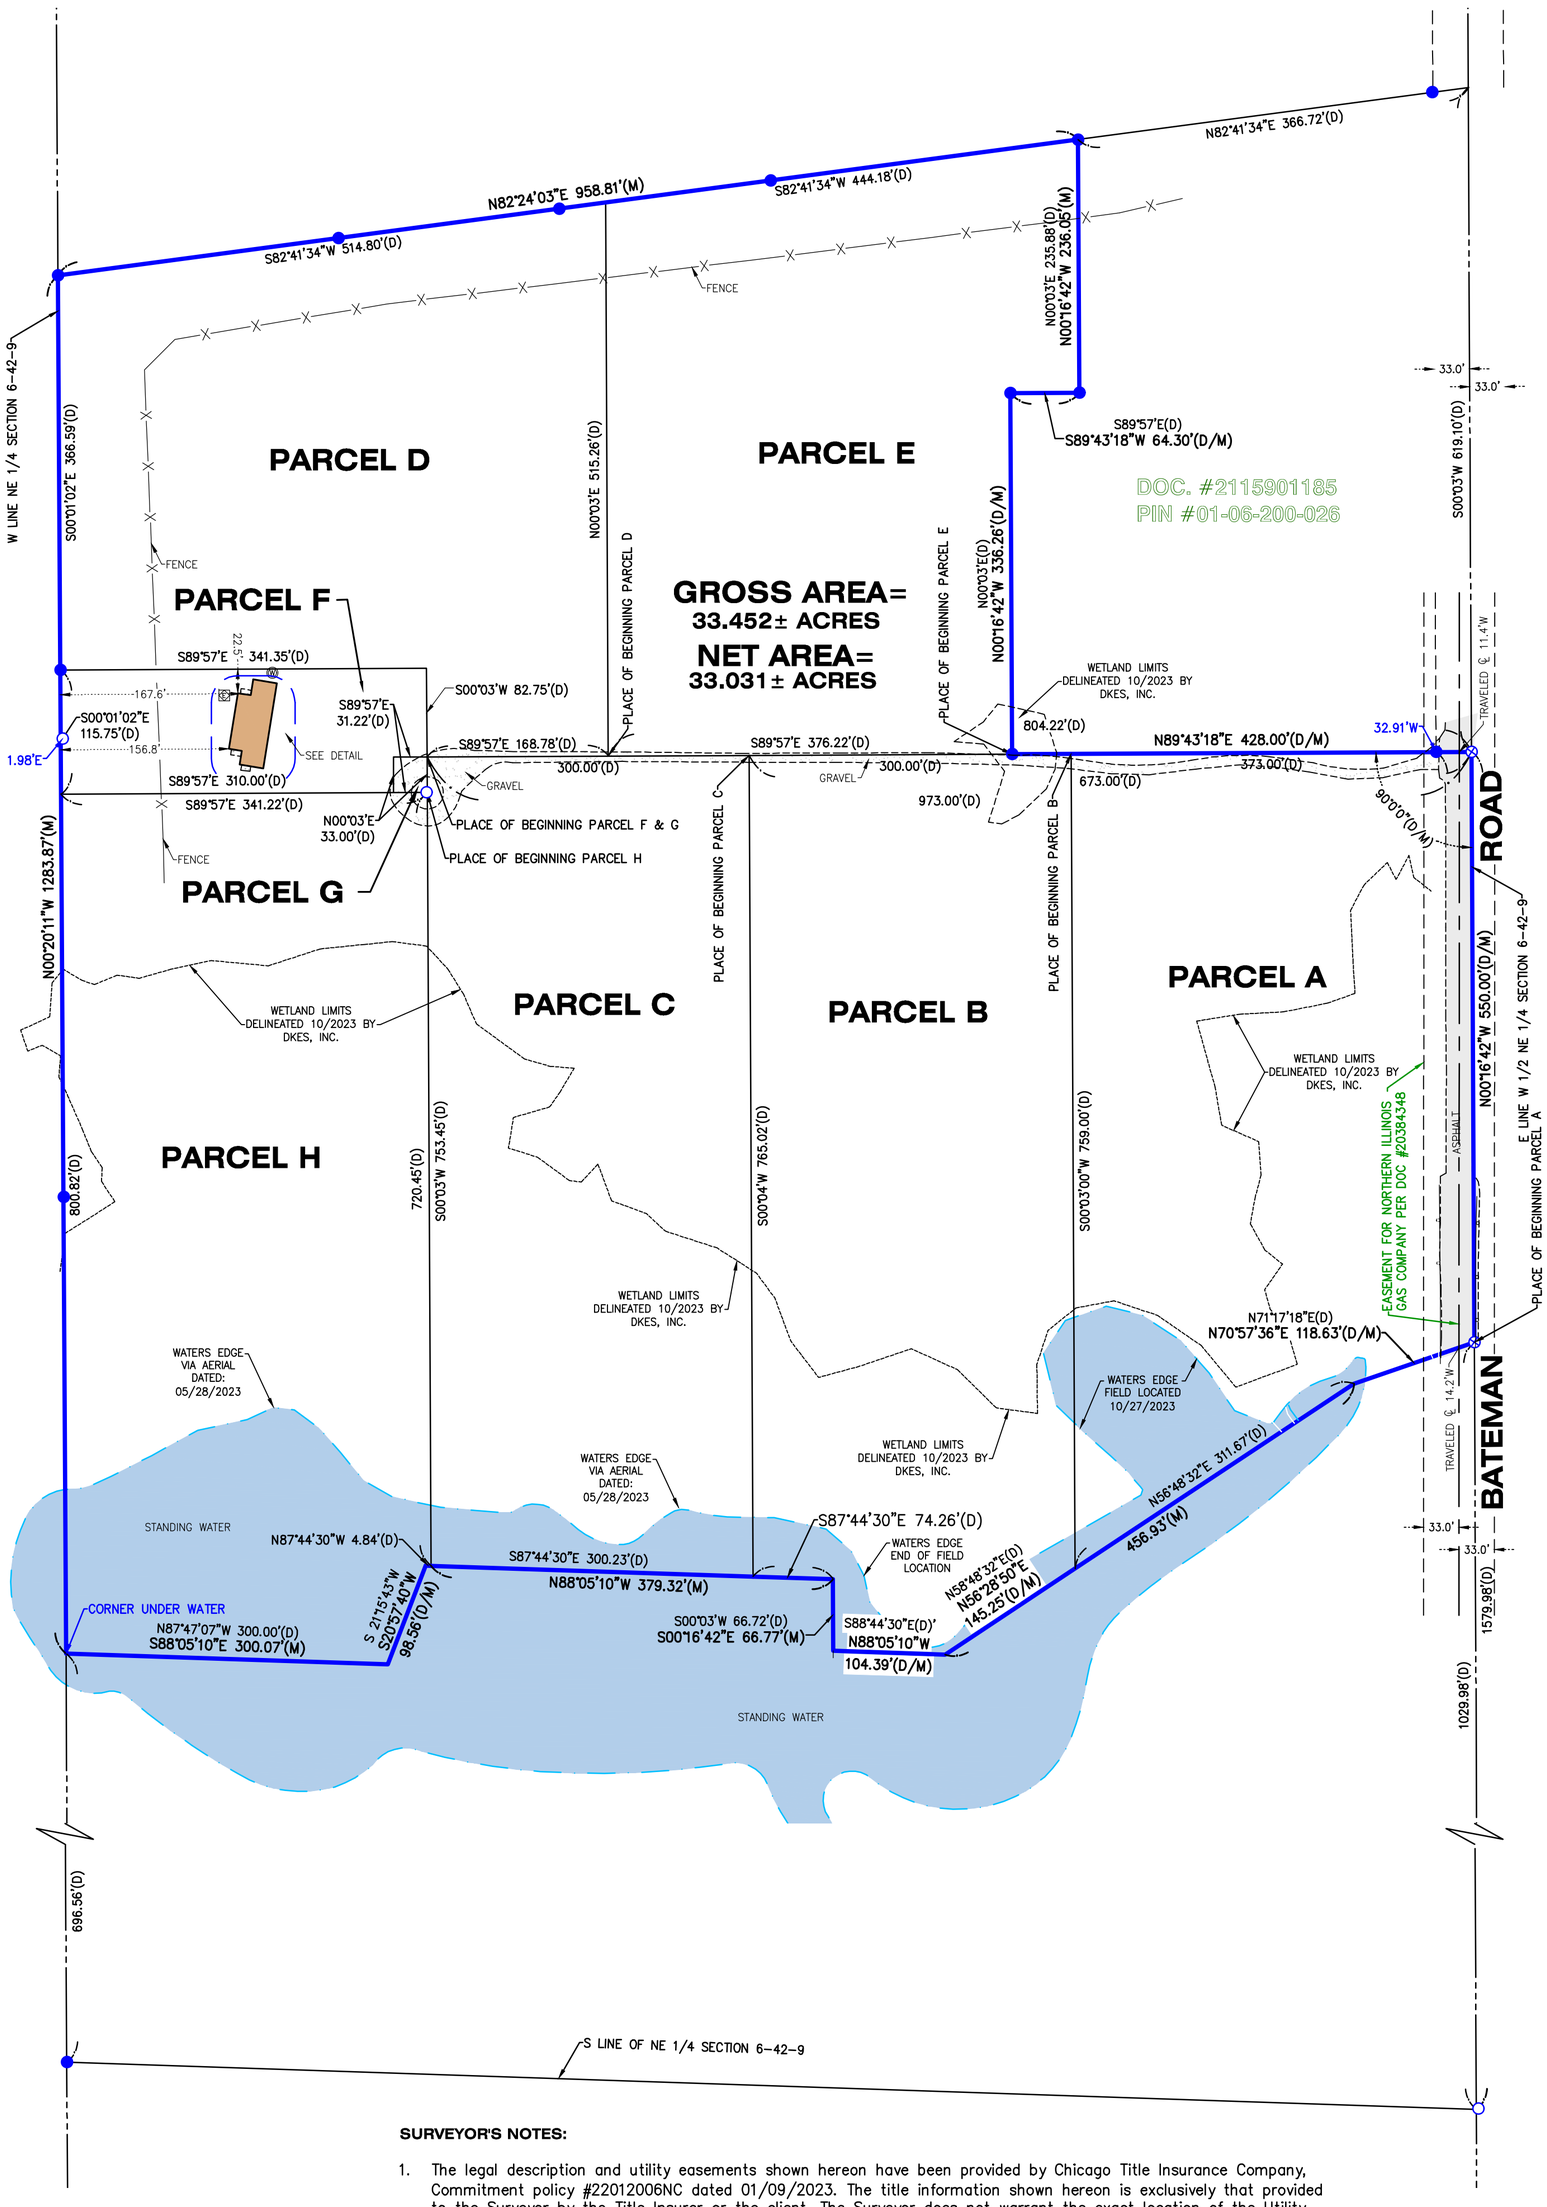
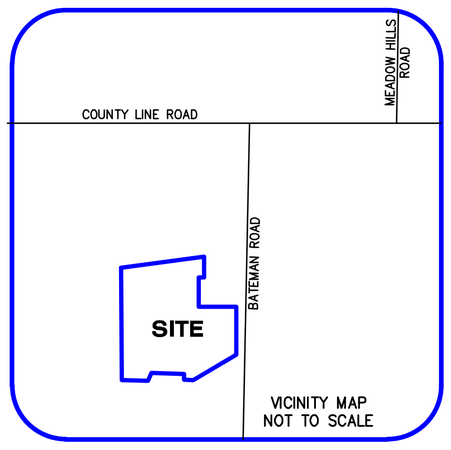
ALTA/NSPS LAND TITLE SURVEY





LEGAL DESCRIPTION:

Parcel A:
That part of the West Half of the Northeast Quarter of Section 6, Township 42 North, Range 9, East of the Third Principal Meridian, described as follows: Beginning on the East line of the West Half of said Northeast Quarter at a point 1029.98 feet North of the South line of said Northeast Quarter (as measured along the East line of said West Half); thence continuing North along the East line of said West Half 550.0 feet; thence West at right angles to the last described line, 373.0 feet; thence South 00 degrees 03 minutes 00 seconds West along a line parallel with the East line of the said West Half 759.0 feet; thence North 56 degrees 48 minutes 32 seconds East 311.67 feet; thence North 71 degrees 17 minutes 18 seconds East 118.63 feet to the Place of Beginning, all in Cook County, Illinois.

Parcel B:
That part of the West Half of the Northeast Quarter of Section 6, Township 42 North, Range 9 East of the Third Principal Meridian, described as follows: Commencing at a point on the East line of the West Half of said Northeast Quarter and said point being 1579.98 feet North of the South line of said Northeast Quarter (as measured along the East line of said West Half) thence West (at right angles to the last described line) 373.0 feet to the Place of Beginning; thence continuing West along the last described line 300.0 feet; thence South 00 degrees 03 minutes West along a line parallel with the East line of said West Half 765.02 feet; thence South 87 degrees 44 minutes 30 seconds East 74.26 feet; thence South 00 degrees 03 minutes West 66.72 feet; thence South 87 degrees 44 minutes 30 seconds East 104.39 feet; thence North 58 degrees 48 minutes 32 seconds East 145.25 feet; thence North 00 degrees 03 minutes East parallel with the East line of said Lot West Half 759.0 feet to the Place of Beginning.

Parcel C:
That part of the West Half of the Northeast Quarter of Section 6, Township 42 North, Range 9 East of the Third Principal Meridian, described as follows: Commencing at a point on the East line of the West Half of said Northeast Quarter and said point being 1579.98 feet North of the South line of said Northeast Quarter (as measured along the East line of said West Half); thence West at right angles to the last described line 673.0 feet to the Place of Beginning; thence continuing West along the last described line 300.0 feet; thence South 00 degrees 03 minutes West along a line parallel with the East line of said West Half 753.45 feet; thence South 87 degrees 44 minutes 30 seconds East 300.23 feet; thence North 00 degrees 03 minutes East parallel with the East line of said West Half 765.02 feet to the Place of Beginning.

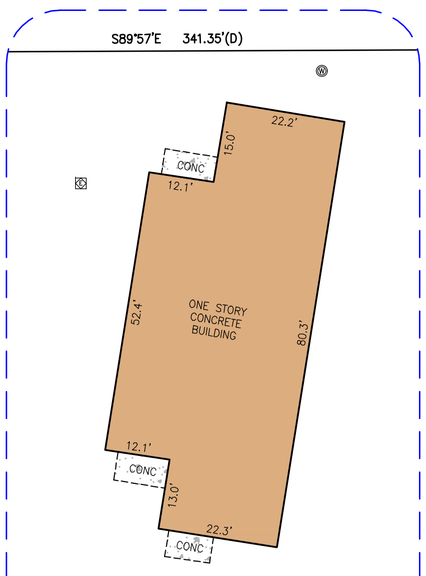
Parcel D:
That part of the West Half of the Northeast Quarter of Section 6, Township 42 North, Range 9 East of the Third Principal Meridian, described as follows: Commencing on a point on the East line of the West Half of said Northeast Quarter and said point being 1579.98 feet North of the South line of said Northeast Quarter (as measured along the East line of said West Half); thence West (at right angles to the last described line) 804.22 feet to the Place of Beginning; thence North 00 degrees 03 minutes East along a line parallel with the East line of said West Half, 515.26 feet; thence South 82 degrees 41 minutes 34 seconds West, 514.80 feet to the West line of the Northeast Quarter of said Section 6; thence South 00 degrees 01 minutes 02 seconds East, 366.59 feet; thence South 89 degrees 57 minutes East, 341.35 feet; thence South 00 degrees 03 minutes West, 82.75 feet; thence South 89 degrees 57 minutes East, 168.78 feet more or less to the Place of Beginning, all in Cook County, Illinois.

Parcel E:
That part of the West Half of the Northeast Quarter of Section 6, Township 42 North, Range 9 East of the Third Principal Meridian, described as follows: Commencing at a point on the East line of the West Half of said Northeast Quarter and said point being 1579.98 feet North of the South line of said Northeast Quarter (as measured along the East line of said West Half); thence West (at a right angle to the last described line) 428.0 feet to the Place of Beginning; thence North 00 degrees 03 minutes East along a line parallel with the East line of said West Half, 336.26 feet; thence South 89 degrees 57 minutes East, 64.30 feet; thence North 00 degrees 03 minutes East, 235.88 feet; thence South 82 degrees 41 minutes 34 seconds West, 444.18 feet; thence South 00 degrees 03 minutes West, 515.26 feet; thence South 89 degrees 57 minutes East, 376.22 feet, more or less, to the Place of Beginning, all in Cook County, Illinois.

Parcel F:
That part of the West Half of the Northeast Quarter of Section 6, Township 42 North, Range 9 East of the Third Principal Meridian, described as follows: Commencing at a point on the East line of the West Half of said Northeast Quarter and said point being 1579.98 feet North of the South line of said Northeast Quarter (as measured along the East line of said West Half); thence West (at a right angle to the last described line) 973.0 feet to the Place of Beginning; thence North 00 degrees 03 minutes East along a line parallel with the East line of said West Half 82.75 feet; thence North 89 degrees 57 minutes 00 seconds West, 341.35 feet to the West line of the Northeast Quarter of said Section 6; thence South 00 degrees 01 minutes 02 seconds East along the West line of the Northeast Quarter of said Section 6, 115.75 feet; thence South 89 Degrees 57 minutes East, 310.0 feet; thence North 00 degrees 03 minutes East, 33.0 feet; thence South 89 degrees 57 minutes East, 31.22 feet, more or less, to the Place of Beginning, in Cook County, Illinois.

Parcel G:
That part of the West Half of the Northeast Quarter of Section 6, Township 42 North, Range 9 East of the Third Principal Meridian, described as follows: Commencing at a point on the East line of the West Half of said Northeast Quarter and said point being 1579.98 feet North of the South line of said Northeast Quarter (as measured along the East line of said West Half); thence West (at a right angle to the last described line), 973.0 feet to the Place of Beginning; thence South 00 degrees 03 minutes West along a line parallel with the East line of said West Half, 33.0 feet; thence North 89 degrees 57 minutes 00 seconds West, 31.22 feet, more or less, to a point that it 310.0 feet East of the West line of said Quarter Section; thence North 00 degrees 03 minutes East, parallel with the East line of said West Half, 33.0 feet, thence South 89 degrees 57 minutes East, 31.22 feet, more or less, to the Place of Beginning, in Cook County, Illinois.

Parcel H:
That part of the West Half of the Northeast Quarter of Section 6, Township 42 North, Range 9 East of the Third Principal Meridian, described as follows: Commencing at a point on the East line of the West Half of said Northeast Quarter and said point being 1579.98 feet North of the South line of said Northeast Quarter (as measured along the East line of said West Half); thence West (at a right angle to the last described line), 973.0 feet; thence South 00 degrees 03 minutes West along a line parallel with the East line of said West Half, 33.0 feet to the Place of Beginning; thence continuing South along the last described line, 720.45 feet; thence North 87 degrees 44 minutes 30 seconds West, 4.84 feet; thence South 21 degrees 15 minutes 43 seconds West, 98.56 feet; thence North 87 degrees 47 minutes 07 seconds West, 300.0 feet parallel with the South line of said Northeast Quarter, to a point of intersection with the West line of said Northeast Quarter; thence North along said West line, 800.82 feet; thence South 89 degrees 57 minutes East, 341.22 feet, more or less, to the Place of Beginning, all in Cook County, Illinois.



DETAIL
SCALE: 1"=20'

SURVEYOR'S NOTES:

1. The legal description and utility easements shown hereon have been provided by Chicago Title Insurance Company, Commitment policy #22012006NC dated 01/09/2023. The title information shown hereon is exclusively that provided to the Surveyor by the Title Insurer or the client. The Surveyor does not warrant the exact location of the Utility Easements shown hereon, but does state that they are located as accurately as possible from the information provided.
2. Based on Flood Insurance Rate Map, Panel No. 17031c0015j, dated 08/19/2008, the subject property lies within Zone "X", areas determined to be outside the 0.2% annual chance floodplain, Also Zone "A", No base flood elevations determined.
3. Distances are marked in feet and decimal places thereof, no dimension shall be assumed by scale measurement hereon. Distances and/or bearings shown with a "D" in parenthesis (D) are record or deed values, not field measured.
4. Compare this plat, legal description and all survey monuments before building, and immediately report any discrepancies to the surveyor.
5. The location of the property lines shown on the face of this plat are based on the legal description contained in the title commitment and shown hereon. This information has been furnished by the client and compared to record deeds to check for gaps and /or overlaps. However, this survey may not reflect historical matters of title and ownership that have not been disclosed by the title commitment.
6. Only the improvements which were visible from above ground at time of survey and through a normal search and walk through of the site are shown on the face of this plat. Lawn sprinkler systems, if any, are not shown on this survey.
7. Manholes, inlets and other utility rims or grates shown hereon are from field location of such, and only represent such utility improvements which are visible from above ground survey at the time of survey, through a normal search and walk through of the site. The labeling of these manholes (sanitary, water, etc) are based solely on the "stamped" markings on the rim. No underground observations have been made to verify the actual use or existence of underground utilities.
8. Surface indications of utilities on the surveyed parcel have been shown. Underground and offsite observations have not been made to determine the extent of utilities serving or existing on the property, public and/or private records have not been searched to provide additional information. Overhead wires and poles (if any) have been shown, however their function and dimensions have not been shown.
9. This survey may not reflect all utilities or improvements, if such items are hidden by landscaping, or are covered by such items as dumpsters or trailers or when the site was covered with snow. At the time of survey, the site was not covered by snow.
10. This survey makes no statement regarding the actual presence or absence of any service or utility line. Controlled underground exploratory effort together with "JULIE" markings is recommended to determine the full extent of underground service and utility lines. Contact J.U.L.I.E. at 1-800-892-0123.
11. Restrictions that may be found in local buildings and/or zoning codes have not been shown. Height and bulk restrictions (if any) have not been shown. Only those setback restrictions shown on the recorded subdivision plat or in the title commitment have been shown.
12. There is no posted address on site. (Pertains to Table A, item 2).
13. There is a total of 0 striped parking spaces for cars, including none of which are marked handicapped and none of which are for motorcycles. (Pertains to Table A, item 9).
14. The title commitment referenced in note #1 does not indicate any recorded dedication for Bateman Road. The location of the center of the road is only an opinion and is based on a 66' right-of-way using the centerline as traveled. net areas were calculated using this information and removing any area located within the prescriptive right-of-ways.

SCHEDULE B, PART II EXCEPTIONS:

15. Exceptions: 6 & 11 are not survey related.
16. Exceptions: 7, 8, 9, 12 & 16 are blanket in nature.
17. Exceptions: 10 & 14 are plotted hereon.
18. Exceptions: 11 & 15 does not lie on the above described lands.

SPECIAL WARRANTY DEED

THIS INDENTURE, made this 3rd day of December, 2022 between * ~~SYNERGY PROPERTY HOLDING, LLC~~ an Illinois limited liability company, P.O. Box 3862, Evansville, Indiana 47737, party of the first part, and ANOOSH VARDA and ALBERTA VARDA, husband and wife, not as Tenants by the Entirety or Tenants in Common, but as Joint Tenants with the right of survivorship, party of the second part, WITNESSETH, that the party of the first part, for and in consideration of the sum of Ten and No/100 Dollars ($10.00) and other good and valuable consideration in hand paid, by the party of the second part, the receipt whereof is hereby acknowledged, by these presents does REMISE, RELEASE, ALIEN AND CONVEY unto the party of the second part, FOREVER, all of the following described real estate, situated in the County of Cook and State of Illinois known and described as follows to wit:

* SYNERGY PROPERTY HOLDINGS, LLC

See Exhibit "A" attached hereto and made a part hereof

Together with all and singular the hereditaments and appurtenances thereunto belonging, or in any way appertaining, and the reversion or reversions, remainder or remainders, rents, issues and profits thereof, and all of the estate, right, title, interest, claim or demand whatsoever, of the party of the first part, either in law or equity of, in and to the above described premises, with the hereditaments and appurtenances:

TO HAVE AND TO HOLD the said premises as above described, with the appurtenances, unto the party of the second part, forever.

Party of the first part, for itself, and its successors, makes no warranties, representations or covenants whatsoever concerning the above referenced property described herein or its condition, it being expressly understood that except for those representations and warranties in the Agreement of Purchase and Sale between the parties, the property is being sold **"AS IS" and "WHERE IS" with no warranties, either expressed or implied, including, but not limited to, warranties of fitness for a particular purpose.** And the party of the first part, for itself, and its successors, does covenant, promise and agree to and with the party of the second part, and successors, that it had not done or suffered to be done, anything whereby the said premises hereby granted are, or may be, in any manner encumbered or charged, except as herein recited; and that it WILL WARRANT AND DEFEND, the said premises against all persons lawfully claiming, or to claim the same, by, through or under it, subject only to general exceptions of the title commitment; general real estate taxes not yet due and payable at the time of closing; covenants, conditions, and restrictions of record; public and utility easements of record; building lines and building laws, ordinances and restrictions; drainage and detention easements, drainage ditches, feeder, laterals and drain tile, pipe or other conduit; annexation agreements and annexation ordinances of record; all special governmental taxes

or assessments confirmed and unconfirmed as the same appears on the real estate tax bill issues by the Cook County Treasurer; use and occupancy restrictions; zoning laws and ordinances; public roads and highways, if any; condominium regular or special assessments confirmed and unconfirmed, if any; acts done by or suffered through party of the second part; reservation of mineral rights; any code violations currently existing on or in the subject premises; existing liens and other matters of title over which the title company is willing to insure over without cost or liability for payment to the party of the second part; and those other title exceptions assumed by party of the second part under the terms of the purchase contract.

IN WITNESS WHEREOF, said party of the first part has caused its corporate seal to be hereto affixed, and had caused its name to be signed to these presents by its Vice President as of the day and year first above written.

Re: 99-101 Bateman Rd Subdivision Review #4
Job: VBH001.0121.101 - 101 Bateman Road

Village Clerk,

Trotter and Associates, Inc. (TAI) has reviewed the submitted documents for the proposed improvements at 99-101 Bateman Rd.

The Barrington Hills, Illinois Village Code was used in review of this application.

https://codelibrary.amlegal.com/codes/barringtonhillsil/latest/overview

The following documentation was provided for this review by the applicant:

- Supplemental Sub Submittal Letter to Village (Dated: 03.21.2024)
- Preliminary Analysis & Inventory Memo by Caldwell Engineering LTD. (Dated: 03.21.2024)
- Alta Title Policy from Chicago Title Insurance Company (Dated: 01.09.2023)
- Proposed Preliminary Subdivision Plan (Dated 3.21.2024)
- Plat of Survey – Vanderstappen Land Surveying INC. (VLSI) (Dated 8.10.2023)
- Legal description of property Exhibit (Dated 2.22.2024)
- Subdivision Application Form (Dated 2.23.2024)
- Adjacent Property Affidavit
- Complete List of all permanent parcel located within 250 feet of the property (Dated 2-23-2024)
- ALTA/ NSPS Land Title Survey (Dated:05.06.2024)

After review of the documents identified above, **TAI recommends approval** of the minor subdivision sketch plan.

If there are any questions regarding the comments above, please do not hesitate to contact me directly (a.dye@trotter-inc.com).

Sincerely,

Alex Dye, PE, CFM

Re: Project: Site Improvements for Varda Subdivision
Location: 99 & 101 Bateman Road, Barrington Hills, IL 60010
CE #: CE23.003

Dear Mrs. Panos,
We have received the Trotter and Associates, Inc. (TAI) comment regarding the Proposed Varda Subdivision to be located at 99 & 101 Bateman Road, Barrington Hills, IL 60010.

Enclosed with this letter are:

- Varda Subdivision Preliminary Analysis & Inventory Memorandum with Exhibit ,Dated 03-21-2024.
- Policy of Title Insurance , Policy Number 22012006NC
- Proposed Preliminary Subdivision Plan, Dated 03-21-2024

Listed below are the comments followed by our responses:

Comment 1: Provide a Name for the subdivision and include this on submitted documents.

Response 1: The name of the subdivision has been provided and included on all submitted documents.

Comment 2: Please provide a title policy or Alta survey for the proposed improvements meeting the requirements of 6-3-3.

Response 2: The title policy has been provided.

Comment 3: Provide an inventory of the site meeting the requirements as listed in the ordinance.

Response 3: The inventory of the site meeting the requirements as listed in the ordinance has been provided within the VARDA SUBDIVISION PRELIMINARY ANALYSIS & INVENTORY MEMORANDUM.

Comment 4: Some tree information is listed on a plat, but an official tree survey is required.

Response 4: The tree information has been provided. This can be seen on Professional Tree Survey of the Bateman Road Site, DKES, Inc. Dated 07/10/2023

Comment 5: Please prepare an aerial photograph of the site.

Response 5: The aerial photograph of the site has been prepared. This can be seen on Preliminary Analysis and Inventory Exhibit, Dated 03-20-2024.

Should you have any questions or comments about this matter, please contact me.

Sincerely,
Caldwell Engineering Ltd.

Michael Caldwell, PE CFM
President

VARDA SUBDIVISION PRELIMINARY ANALYSIS & INVENTORY MEMORANDUM

March 21, 2024

To: Village of Barrington Hills

From: Michael J. Caldwell, PE, CFM, Caldwell Engineering, Ltd.

Re: Project: Varda Subdivision
Location: 99 & 101 Bateman Road, Barrington Hills,
LTD #: CE23.003

This memorandum is for the Varda Subdivision Site Inventory as required by the Barrington Hills Subdivision Code, Section 6-3-3. A. 2. e. This inventory shall encompass a distance of not less than five hundred feet (500') for minor subdivisions.

The site inventory and analysis shall consider:

- topography;
- soils and geology;
- waterways, wetlands and drainage;
- wildlife;
- adjacent land uses and zoning;
- utilities and related easements;
- riding trails, roadways and traffic circulation;
- vegetation on the site;
- tree inventory;
- an aerial photograph of the site.

THIS INFORMATION IS CONTAINED IN THE FOLLOWING ATTACHMENTS

- Preliminary Analysis and Inventory Exhibit, Dated 03-21-2024.
- Professional Tree Survey of the Bateman Road Site, DKES, Inc. Dated 07/10/2023
- Wetland Assessment Report, DKES, Inc. Dated 12/04/2023
- Septic Soil Analysis, John A. Raber and Associates, Inc. Dated 03/23/2023
- NRCS - Web Soil Survey. Dated 01/23/2023

Subject: Professional Tree Survey of the Bateman Road Site
99 & 101 Bateman Road
Barrington Hills, Cook County, Illinois 60010
DKES/BEI Project #075.2023

Dear Mr. Varda:

DK Environmental Services (DKES) / Bollinger Environmental, Inc. (BEI) staff conducted a Tree Survey of the Bateman Road Site located at 99 and 101 Bateman Road (approximately 33 acres), in the Village of Barrington Hills, Cook County, Illinois on July 7, 2023.

Both living and dead trees possessing a trunk size of six (6) inches or greater in diameter were tagged, as measured at 4.5 feet above the ground to achieve diameter breast height (DBH). We used common and scientific names following the nomenclature in the *Chicago Region FQA (Floristic Quality Assessment) Calculator (Herman et. al., Nov. 28, 2022)*. The Tree Inventory Table lists: tree tag number, common name, scientific name, size (DBH), condition, form, general comments regarding the quality of the identified trees, and field date. A total of five hundred eighty-one (581) trees were identified during this investigation. Please note that tags 1001 to 1581 were used for trees encountered in the field.

During the survey, each tree was evaluated and assigned a number rating based on a scale rating from 1 – 6. The following summarizes the rating scale in the *Condition* column of the Tree Inventory Report. These ratings are established and based on general observations at the time of the inventory.
A rating of 1 (excellent) will have the highest value in terms of protection or preservation.
A rating of 6 (worst) will have the lowest value and quality.
For example:

Rating	Description	General Criteria
1	Excellent	The tree is typical of the species, has less than 10 percent deadwood in the crown that is attributable to normal causes, has no other observed problems, and requires no remedial action.
2	Good	The tree is typical of the species and/or has less than 20 percent deadwood in the crown, only 1 or 2 minor problems that are easily corrected with normal care.

3	Fair	The tree is typical of the species and/or has less than 30 percent deadwood in the crown, 1 or 2 minor problems that are not imminently lethal to the tree and no significant decay or structural problems, but the tree must have remedial care above normal care in order to minimize the impact of future stress and to ensure continued health.
4	Fair to poor	The tree is not typical of the species and/or has significant problems such as 30 to 50 percent deadwood in the crown, serious decay or structural defect, insects, disease or other problems that can be imminently lethal to the tree or create a hazardous tree if not corrected in a short period of time or if the tree is subjected to additional stress.
5	Poor	The tree is not typical of the species and/or has over 50 percent deadwood in the crown, major decay or structural problems, is hazardous or is severely involved with insects, disease, or other problems that even if aggressively corrected would not result in the long-term survival of the tree.
6	Dead	Less than 10 percent of the tree shows signs of life.

Please feel free to contact me with any questions.

Subject: Wetland Assessment – 99/101 Bateman Road
Barrington Hills, IL 60010 COOK COUNTY
PIN#: 01-06-200-021 & 027 (33.5 acre site approx.)

Dear Mr. Varda:

On October 15, 2023, DK Environmental Services, Inc. (DKES) completed a wetland field assessment of the ±33.5-acre subject property, generally located southwest of the intersection at West County Line Road and Bateman Road in the Village of Barrington Hills, Cook County, Illinois.

A total of two (2) water features meeting wetland criteria were identified within the study area. The wetland areas flagged on-site are labeled "Wetland A" at the southern portion of the site and "Wetland B" along the driveway at the north/central portion as shown on Exhibit 7 of this report. During the field reconnaissance, labeled "wetland delineation" wire pin flags and ribbon numbered A1-A86 and B1-B14 (respectively) were installed into the ground and/or affixed to live vegetation outside the perimeter of the wetland limits to identify the on-site wetland boundaries. Following the wetland jurisdictional determination and updated wetland boundary confirmation completed by the US Army Corps of Engineers (ref. LRC-2021-00440), the wetland flags were then surveyed by others. Wetlands A & B have been determined to be under the jurisdiction of the USACE – Chicago District, and therefore subject to Federal regulation.

U.S. Army Corps of Engineers Regulations and Permitting Considerations

The USACE regulates the discharge of dredged or fill material into federally jurisdictional wetlands and "waters of the U.S." under Section 404 of the Clean Water Act (Act). Jurisdictional areas covered by the Act are navigable waterways, tributaries to navigable waterways, and wetlands adjacent thereto. Isolated wetlands are exempt from federal regulations following the January 2001 Supreme Court decision (SWANCC v. USACE).

On May 25, 2023, the Supreme Court ruled in Sackett v. EPA, delineating the appropriate standard to determine waters of the United States (WOTUS) under the federal Clean Water

Act (CWA). The Supreme Court's opinion in Sackett establishes a new, stricter test for determining whether the Clean Water Act applies to a wetland. In order to assert federal jurisdiction over an adjacent wetland under the CWA, a party must establish that the wetland:

(1) is adjacent to a WOTUS, and
(2) has a continuous surface connection with the WOTUS.

The USACE (USACE Federal Register 1982) and the U.S. Environmental Protection Agency (EPA Federal Register1980) jointly define wetlands as: "Those areas that are inundated or saturated by surface or ground water at a frequency and duration sufficient to support, and that under normal circumstances do support, a prevalence of vegetation typically adapted for life in saturated soil conditions". Identification of wetlands is based on a three-factor approach involving indicators of hydrophytic vegetation, hydric soil, and wetland hydrology, originally set forth by the USACE in the 1987 Environmental Laboratory publication entitled "Corps of Engineers Wetlands Delineation Manual: Technical Report Y-87-1", commonly referred to as the1987 Wetlands Delineation Manual.

The Midwest Region supplement to the 1987 Wetlands Delineation Manual was released in 2010 outlining updated technical guidance and procedures for identifying and delineating wetlands that may be subject to regulatory jurisdiction under Section 404 of the Clean Water Act (CWA) or Section 10 of the Rivers and Harbors Act.

This wetland delineation was conducted using methodology presented in the "Regional Supplement to the Corps of Engineers Wetland Delineation Manual: Midwest Region (2010 U SACE Midwest Region Manual)." On May 27, 2015, the EPA and the USACE finalized the Clean Water Rule (CWR), which clarifies protection of "Waters of the U.S." (WOUS) under the CW A. The CWR went into effect on August 28, 2015; however, the US Court of Appeals for the Sixth Circuit issued a nationwide stay of the CWR on October 9,2015 while the CWR is being challenged. WOUS are generally open water areas such as rivers and lakes including wetlands that are connected to navigable waterways and their tributaries.

Under current USACE regulations (USACE 2012), to prevent a net loss of wetland, any disturbance of wetlands/waters of the U.S. area requires a permit application. Filling 0.10 acre or more of jurisdictional wetland/waters of the U.S. requires a permit with mitigation at a 1.5:1 replacement ratio. The mitigation ratio increases if an area is considered a High-Quality Aquatic Resource (HQAR).

Areas of wetland/waters of the U.S. fill less than 0.10 acre also require a permit. However, mitigation may or may not be required depending on USACE discretion. This discretionary judgment is determined by the overall quality of the wetland and what impact the loss of wetland would have on the surrounding area. USACE regulations require an upland buffer of native plants adjacent to all created, restored, enhanced and preserved wetlands 0.10 acre or larger. Buffer width requirements are as follows:

- For a linear body of water (e.g., river, stream, creek, etc.), the buffer shall be a minimum of 50 feet from the Ordinary High-Water Mark (OHWM) on both sides of the linear water body.

- For any other "waters of the U.S.", including wetlands from 0.25 acres up to 0.50 acres, the buffer shall be a minimum of 30 feet.
- For any "waters of the U.S.", including wetland over 0.50 acres, the buffer shall be minimum of 50 feet.
- For any area determined to be a HQAR, the buffer shall be 100 feet wide (80 foot minimum).

MWRD Cook County Regulations and Wetland Permitting Considerations

Development that impacts on-site, standard isolated wetlands that are equal to or greater than one-tenth of an acre (0.10 acre) in aggregate shall be prohibited unless documentation is submitted which demonstrates that no practicable alternative to wetland modification exists. Based upon a review of the submitted documentation and other available resources, either the District or an authorized municipality will make a determination as to whether the proposed wetland modifications will be permitted.

Development that impacts onsite standard isolated wetlands with a total acreage less than one-tenth of an acre (0.10 acre) in aggregate, including contiguous isolated Waters less than one-tenth of an acre (0.10 acre), does not require documentation showing that no practicable alternatives to wetland modification exist.

Mitigation for developments that impact an isolated wetland shall provide for the replacement of the lost wetland environment.

A. Impacts to standard isolated wetlands less than one-tenth of an acre (0.10 acre) in aggregate do not require mitigation;
B. Impacts to standard isolated wetlands more than or equal to one-tenth of an acre (0.10 acre) in aggregate shall be mitigated at a minimum ratio of one-and-one-half acre of creation for each acre impacted (1.5:1);
C. High quality isolated wetlands impacts shall be mitigated at a minimum ratio of three acres of creation for each acre impacted (3:1);

Mitigation credit may also be obtained for wetland enhancement. For example, the enhancement of farmed wetlands meeting the size criteria of the WDO may be used for up to 80% of the mitigation requirement. Enhancement of existing non-farmed wetlands may be credited up to 25% of the enhanced wetland acreage completed, provided the wetland impacted acreage created on-site is a minimum 1:1 ratio.

Isolated wetland buffers shall be determined according to the classification of the wetland. Minimum isolated wetland buffer widths shall be as follows:

- Thirty feet from the boundary of standard isolated wetlands greater than or equal to one-tenth of an acre (0.10 acre) and less than one-half of an acre (0.5 acre) in area;
- Fifty feet from the boundary of standard isolated wetlands greater than or equal to one-half of an acre (0.5 acre) in area; or
- One-hundred feet from the boundary of high-quality isolated wetlands.

Riparian buffers shall be determined according to the classification of the wetland. Minimum isolated wetland buffer widths shall be as follows:

- For any Jurisdictional Waters of the U.S. that does not qualify as a wetland, the riparian environment shall be 50 feet from the OHWM.
- For any Isolated Waters that does not qualify as a wetland, the riparian environment shall be 30 feet from the OHWM.
- For any Jurisdictional Waters of the U.S. or for any Isolated Waters that do not qualify as a wetland, and which have a BSC of "A" or "B", the riparian environment shall be 100 feet from the OHWM.
- For any Jurisdictional Waters of the U.S. or Isolated Waters that do not qualify as a wetland identified as a BSS, the riparian environment shall be 100 feet from the OHWM.

Generally, the following three steps must be attempted before authorization is issued:

(1) Avoid wetland and "waters of the U.S.";
(2) Minimize wetland and "waters of the U.S." fill impacts; and
(3) Provide compensatory mitigation.

The attached report describes the identified wetlands and provides the methodology and reference material used to assist in the wetland assessment. Routine On-Site Data Forms, required by the USACE are also included.

This assessment is based on field conditions at the time of the DKES site visit and our understanding of current federal, state, and local regulations. An evaluation of historic site conditions was not performed.

Please contact our office should you have any questions or if we can be of further assistance.

Sincerely,

Daniel J. Krill CPESC, CWS #002
President

INTRODUCTION

On October 15, 2023, DK Environmental Services, Inc. (DKES) completed a wetland field assessment of the ±33.5-acre subject property, generally located southwest of the intersection at West County Line Road and Bateman Road in the Village of Barrington Hills, Cook County, Illinois.

A total of two (2) water features meeting wetland criteria were identified within the study area. The wetland areas flagged on-site are labeled "Wetland A" at the southern portion of the site and "Wetland B" along the driveway at the north/central portion as shown on Exhibit 7 of this report. Approximate wetland limits and data point locations are depicted on Exhibit 7 in relation to project boundaries, included in Appendix A. The survey is used for baseline natural resource planning, regulatory permitting, wetland buffer and impact determination in the design and layout of the proposed property development.

During the field reconnaissance, labeled "wetland delineation" wire pin flags and ribbon numbered A1-A86 and B1-B14 (respectively) were installed into the ground and/or affixed to live vegetation outside the perimeter of the wetland limits to identify the on-site wetland boundaries. Following the wetland jurisdictional determination and updated wetland boundary confirmation completed by the US Army Corps of Engineers (ref. LRC-2021-00440), the wetland flags were then surveyed by others. Wetlands A & B have been determined to be under the jurisdiction of the USACE – Chicago District, and therefore subject to Federal regulation.

This report was prepared to document our findings with respect to the extent and quality of wetland(s) identified, and to assist in the determination as to whether the on-site wetland areas are federally jurisdictional under Section 404 of the Clean Water Act. Wetland boundaries were delineated in accordance with methodology established by the U.S. Army Corps of Engineers (USACE): *Corps of Engineers Wetland Delineation Manual*, dated January 1987, including the *Regional Supplement to the Corps of Engineers Wetland Delineation Manual: Midwest Region*, dated August 2010.

Appendices provide supporting documentation and source materials used in the determination, and include the following:

A) Exhibits

1) Location Map
2) 2022 Aerial Photograph
3) National Wetland Inventory (NWI) Map
4) NRCS Soil Survey (2004)
5) Flood Insurance Rate Map (FIRM)
6) USGS Topographic Survey
7) Approximate Wetland Boundaries and Data Point Locations

B) Representative Site Photographs

C) U.S. Army Corps of Engineers Data Forms

The ±33.5 acre subject property is located at 99/101 Bateman Road in the Village of Barrington Hills, Cook County, IL. The study area is on vacant land situated among large residential estates and natural areas including Spring Lake Forest Preserve to the east. The landform within and surrounding the study site is generally flat to gently sloping, with the property topography drainage sheet flowing overland south toward a tributary of Spring Creek. Mapped FEMA floodway/floodplain areas are depicted at the south of the site, and mapped wetlands are shown on the National Wetland Inventory (NWI).

The US Fish and Wildlife Service NWI map shows the Spring Creek tributary at the southern portion of the site flowing east, which is intermittently flooded and hydrologically connected to a large wetland complex east of Bateman Road. A portion of the on-site creek at the east near Bateman Road is depicted as open water and permanently flooded. The following wetland descriptions are provided:

Classification code: PEM1C

System **Palustrine (P)** : The Palustrine System includes all nontidal wetlands dominated by trees, shrubs, persistent emergents, emergent mosses or lichens, and all such wetlands that occur in tidal areas where salinity due to ocean-derived salts is below 0.5 ppt. It also includes wetlands lacking such vegetation, but with all of the following four characteristics: (1) area less than 8 ha (20 acres); (2) active wave-formed or bedrock shoreline features lacking; (3) water depth in the deepest part of basin less than 2.5 m (8.2 ft) at low water; and (4) salinity due to ocean-derived salts less than 0.5 ppt.
Class **Emergent (EM)** : Characterized by erect, rooted, herbaceous hydrophytes, excluding mosses and lichens. This vegetation is present for most of the growing season in most years. These wetlands are usually dominated by perennial plants.
Subclass **Persistent (1)** : Dominated by species that normally remain standing at least until the beginning of the next growing season. This subclass is found only in the Estuarine and Palustrine systems. Water Regime **Seasonally Flooded (C)** :

Classification code: PUBH

System **Palustrine (P)** : The Palustrine System includes all nontidal wetlands dominated by trees, shrubs, persistent emergents, emergent mosses or lichens, and all such wetlands that occur in tidal areas where salinity due to ocean-derived salts is below 0.5 ppt. It also includes wetlands lacking such vegetation, but with all of the following four characteristics: (1) area less than 8 ha (20 acres); (2) active wave-formed or bedrock shoreline features lacking; (3) water depth in the deepest part of basin less than 2.5 m (8.2 ft) at low water; and (4) salinity due to ocean-derived salts less than 0.5 ppt. Class **Unconsolidated Bottom (UB)** : Includes all wetlands and deepwater habitats with at least 25% cover of particles smaller than stones (less than 6-7 cm), and a vegetative cover less than 30%. Water Regime **Permanently Flooded (H)** : Water covers the substrate throughout the year in all years.

Based on a review of the site topography surveyed by others, it appears the high point of the site is in the northwestern portion of the property at approx. elevation 793.0. The contours fall to the south with lower elevations found along the creek channel at around el. 775.0, with the lowest elevation at the dual 48" culverts under Bateman Road at the southeast under el. 772. A grade difference of nearly 21 feet exists within the study area from the northwest to the southeast.

The site is situated within the Spring Creek Sub-Watershed Planning Area, encompassing 26.9 square miles of both private and public open space. The Spring Creek Watershed is a subwatershed of the Upper Fox River Basin. Spring Creek has benefitted from those large residential lots and the land owned by the Cook County Forest Preserve District. Spring Creek has its own Watershed-Based Plan, which was created in 2012: https://flintcreekspringcreekwatersheds.org/wp-content/uploads/SPRING-CREEK-WATERSHED-BASED-PLAN-2022-UPDATE-0518202214814-1.pdf

The wetland areas identified are summarized below:

WETLAND / WATERS	JURISDICTIONAL STATUS*	FQI	NATIVE MEAN C	DOMINANT VEGETATION On site	WETLAND TYPE
A Flags A1-A86	USACE	22.92**	2.78	Reed Canary Grass (*Phalaris arundinacea)* Narrow leaved cattail *(Typha angustifolia)* Boxelder *(Acer negundo)* Black willow *(Salix nigra)* Eastern cottonwood *(Populus deltoides)* Sandbar willow *(Salix interior)* Common buckthorn *(Rhamnus cathartica)*	Creek/Pond emergent
B Flags B1-B14	USACE	7.24	2.18	Reed Canary Grass (*Phalaris arundinacea)* Sandbar willow *(Salix interior)*	Isolated Depression emergent

**Note 1: Wetland Jurisdiction confirmed by the USACE - Chicago District under* LRC-2021-00440
***Note 2: FQI > 20 is classified as a High-Quality Aquatic Resource (HQAR)*

METHODOLOGY

Our methodology followed *The Corps of Engineers Wetland Delineation Manual*, dated January 1987 as well as the *Regional supplement to the Corps of Engineers Wetland Delineation Manual: Midwest Region*, dated August 2010. Both identify the mandatory technical criteria for wetland identification. The three essential characteristics of a jurisdictional wetland are hydrophytic vegetation, hydric soils and wetland hydrology as described below:

I) Hydrophytic Vegetation: Hydrophytic vegetation is defined as the community of macrophytes that occurs in areas where inundation or soil saturation is either permanent or of sufficient frequency and duration to exert a controlling influence on the plant species present. Hydrophytic vegetation is present when the plant community is dominated by species that can tolerate prolonged inundation or soil saturation during the growing season. Wetland indicator status is the estimated probability a plant species occurs in a wetland area. Reed (1988) designated indicator statuses for the U.S. Fish and Wildlife Service, Region 3, which are based on separating plants into five basic groups:

(1) OBL (Obligate Wetland) almost always occur (estimated probability >99%) in wetlands under natural conditions;

(2) FACW (Facultative Wetland) usually occur in wetlands (estimated probability 67-99%), but occasionally are found in non-wetlands;

(3) FAC (Facultative) are equally likely to occur in wetlands or non-wetlands (estimated probability 34-66%);

(4) FACU (Facultative Upland) usually occur in non-wetlands (estimated probability 67-99%), but occasionally are found in wetlands (estimated probability 1-33%); and

(5) UPL (Upland) almost always occur (estimated probability >99%) in non-wetlands under natural conditions.

If greater than 50% of the plants present are FAC, FACW, or OBL the study area meets the wetland criteria for vegetative cover. Indicator statuses were assigned to plants based on observations on their behavior throughout the region. However, some have been modified to best describe the plants in the Chicago region. In these cases, the category has been enclosed in brackets [ ] on the Floristic Quality Data Summary to indicate that it differs from the Region 3 designation.

Vegetation was sampled within plots to quantitatively characterize wetland and/or upland plant communities within a given area. Within each plot, visual estimates of percent cover of each plant species is documented for each stratum (trees, saplings and shrubs, herbaceous plants and woody vines).

Stratum	Description	Plot and Sample Size Standards*
Trees	Woody plants 3 inches (7.6 cm) or more in diameter at breast height (DBH), regardless of height.	30 feet (9.1 m) radius
Saplings/Shrubs	Woody plants less than 3 inches DBH and greater than 3.28 feet (1 m) tall.	15 feet (4.6 m) radius
Herbaceous	Herbaceous (non-woody) plants, including herbaceous vines, regardless of size, and woody plants less than 3.28 feet tall.	5 feet (1.5 m) radius or 3.28 by 3.28 feet square (1 m^2) quadrat
Woody Vines	Woody vines greater than 3.28 feet in height.	30 feet (9.1 m) radius

*Plot size may vary based on site conditions and vegetative cover

The Dominance Test is then calculated by applying the 50/20 rule. If a plant community passes the Dominance Test, then the vegetation is considered hydrophytic and no further vegetative analysis is required. However, if the plant community fails the dominance test, and indicators of hydric soil and/or wetland hydrology are present then the Prevalence Index is applied.

The Prevalence Index is a weighted-average of wetland indicator status of all plant species within a sample plot. If the plant community satisfies the Prevalence Index, then the vegetation is hydrophytic. If the plant community fails Prevalence Index then it must meet the test Morphological Adaptations to be considered hydrophytic. If this last test fails then the vegetation is considered non-hydrophytic. Results of vegetative sampling are illustrated on the attached Routine U.S. Army Corps of Engineers Data Forms.

A vegetative inventory was compiled for the wetland community. The inventory was taken from a meander search documenting every plant species observed at the time of the site visit. The inventory was then inputted into the Wilhelm and Masters (2001) *Floristic Quality Assessment and Computer Application Program*. Each native plant species has been given a coefficient of Conservatism value (*C*-value), ranging from 0-10.

Conservatism value describes plants displaying varying degrees of tolerance to disturbance, as well as varying degrees of fidelity to specific habitat integrity. A rating of 0 represents common species or species not likely to be found only in natural areas and a rating of 10 represents rare species or species most likely to be found only in natural areas. The Floristic Quality Index (FQI) was developed in an attempt to evaluate the level of intrinsic biodiversity from areas with similar *C*-values, but otherwise differ significantly. This is accomplished by the following equation:

$$FQI = \text{mean } C\text{-value } \sqrt{N}$$

According to Swink and Wilhelm (1994), if an area has an average *C*-value of 3.5 or higher or a FQI of 35 or more, one can be fairly confident that the site has sufficient floristic quality to be at least of marginal natural area quality. If the average *C*-value is 4.5 or higher or has a FQI of 45 or more, then it is almost certain that the remnant has natural area potential. According the USACE Chicago District Regional Permit Program (2007), one measurement

of a "high quality aquatic resource" is that the wetland's average *C*-value is 3.5 or greater, or if the area has a resulting FQI of 20 or greater.

II) Hydric Soils: According to the National Technical Committee for Hydric Soils a hydric soil is a soil that formed under conditions of saturation, flooding or ponding long enough during the growing season to develop anaerobic conditions in the upper part (USDA Soil Conservation Service 1994).

Repeated periods of saturation or inundation combined with microbial activity causes morphological changes within the soil. This promotes biogeochemical processes, such as the accumulation of organic matter and the reduction, translocation, or accumulation of iron and other reducible elements. The result of these processes is useful in identifying hydric soils during both wet and dry periods (USDA Natural Resources Conservation Service 2006).

A description of the soil profile is used to evaluate the presence of a hydric soil. There are 23 hydric soil indicators, and if one is determined to be present it is considered a hydric soil. A detailed description of each of the hydric soil indicators can be found in *Interim Regional supplement to the Corps of Engineers Wetland Delineation Manual: Midwest Region*, dated September 2008.

The hydric soil indicators include:

A1. Histosol
A2. Histic Epipedon
A3. Black Histic
A4. Hydrogen Sulfide
A5. Stratified Layers
A10. 2 cm Muck
A11. Depleted Below Dark Surface
A12. Thick Dark Surface
A16. Coast Prairie Redox
S1. Sandy Mucky Mineral
S3. 5 cm Mucky Peat or Peat
S4. Sandy Gleyed Matrix
S5. Sandy Redox
S6. Stripped Matrix
S7. Dark Surface
F1. Loamy Mucky Material
F2. Loamy Gleyed Matrix
F3. Depleted Matrix
F6. Redox Dark Surface
F7. Depleted Dark Surface
F8. Redox Depressions
F12. Iron-Manganese Masses
TF12. Very Shallow Dark Surface

A soil pit is excavated to the appropriate depth to describe the soils profile. Color of the soil matrix and redox, mottling, and gleying within the profile are described using the Munsell Soil Color Charts (Gretagmacbeth 2000). Generally, a hydric soil is present when there is an organic soil, histic epipedon, sulfidic material, aquic or peraquic moisture regime, reducing soils conditions, soil colors gleyed, bright mottles and/or low matrix chroma, soil listed on the hydric soil list, and iron and manganese. Results of soil sampling and if they meet one of the indicators are illustrated on the attached Routine U.S. Army Corps of Engineers Data Forms.

III) Wetland Hydrology: Wetland hydrology indicators are used in combination with indicators of hydric soil and hydrophytic vegetation. These other indicators reflect a site's history of past episodes of inundation or soil saturation and if they were repeated over a period of time. Hydrologic indicators are the most dynamic of all wetland indicators as they may occur from recent or long-term meteorological conditions. Typically, the presence of water for a week or more during the growing season creates anaerobic conditions. Anaerobic conditions lead to the prevalence of wetland plants.

Wetland hydrology indicators outlined by the 2010 USACE Midwest Region Manual are separated into four groups and are divided into primary or secondary categories based on their estimated reliability in this region. Primary indicators provide stand-alone evidence of a current or recent hydrological event. Secondary indicators provide evidence of recent inundation or saturation when supported by one or more other primary indicators or secondary wetland hydrology indicators but should not be used alone.

Wetland hydrology indictors for the Midwest Region are summarized below:

Indicator	Category	
	Primary	Secondary
Group A - Observation of Surface Water or Saturated Soils		
A1 - Surface water	X	
A2 - High water table	X	
A3 - Saturation	X	
Group B - Evidence of Recent Inundation		
B1 - Water marks	X	
B2 - Sediment deposits	X	
B3 - Drift deposits	X	
B4 - Algal mat or crust	X	
B5 - Iron deposits	X	
B6 - Surface soil cracks		X
B7 - Inundation visible on aerial imagery	X	
B8 - Sparsely vegetated concave surface	X	
B9 - Water-stained leaves	X	
B10 - Drainage patterns		X
B13 - Aquatic fauna	X	
B14 - True aquatic plants	X	
Group C - Evidence of Current or Recent Soil Saturation		
C1 - Hydrogen sulfide odor	X	
C2 - Dry-season water table		X
C3 - Oxidized rhizospheres along living roots	X	
C4 - Presence of reduced iron	X	
C6 - Recent iron reduction in tilled soils	X	
C7 - Thin muck surface	X	
C8 - Crayfish burrows		X
C9 - Saturation visible on aerial imagery		X
Group D - Evidence from Other Site Conditions or Data		
D1 - Stunted or stressed plants		X
D2 - Geomorphic position		X
D5 - FAC-neutral test		X
D9 - Gauge or well data	X	

Areas sampled are required meet one or more of the primary wetland hydrology indicators, which include: surface water, high water table, saturation, water marks, sediment deposits, drift deposits, algal mat or crust, iron deposits, inundation visible on aerial imagery, sparsely vegetated concave surface, water-stained leaves, aquatic fauna, true aquatic plants, hydrogen sulfide odor, oxidized rhizospheres on living roots, presence of reduced iron, recent iron reduction in tilled soils, thin much surface, and gauge or well data.

Absent of primary indicators, a sampled area is required to meet two or more of the secondary indicators to qualify as a hydric soil, which include: surface soil cracks, dry-season water table, crayfish burrows, saturation visible on aerial imagery, stunted or stressed plants, geomorphic position and the FAC-Neutral test. Results of hydrology are illustrated on the attached Routine U.S. Army Corps of Engineers Data Forms.

Waters and Waterways

Due to the nature of open water lakes and well-defined drainage channels for example, waterways may only have one or two of the wetland criteria listed above. The USACE defines the ordinary high watermark (OHWM) as the boundary of waterways. The OHWM is the observed line on the shore established by fluctuations of water and is indicated by physical characteristics such as:

- a clear, natural line impressed on the bank;
- shelving;
- changes in the character of the soil;
- destruction/damage of terrestrial vegetation;
- the presence of litter and debris accumulation; or
- other appropriate means that consider the characteristics of the surrounding areas.

During low stream flow or drought conditions, the OHWM is used to determine the boundary of a waterway. During extremely high stream flow conditions or flood conditions the boundaries of waterways cannot typically be accurately determined. Therefore, waterway boundaries are best delineated when normal stream flow conditions are present.

To differentiate boundaries between waterways and adjacent wetlands, evidence of the OHWM is utilized. Changes in vegetation can also be evaluated to determine where true hydrophytic (FAC and FACW) plant species are present versus aquatic or OBL species; however, it should be noted that in many cases vegetation is not present within the channels of waterways.

Vegetation adjacent to waterways may be limited to species overhanging the banks and channels. If the presence of a waterway is questionable, a review of historic aerial photographs and historic U.S. Geological Survey (USGS) topographic maps can be conducted to confirm the current or historic presence of a waterway. This can include segments of streams that are entirely enclosed.

RESULTS

Below is a brief description of the wetland areas identified on-site with a list of the dominant plant species included, and a description of positive wetland hydrology and hydric soils observed. This is followed by a complete plant inventory and the results of the Wilhelm and Masters (2001) *Floristic Quality Assessment and Computer Application Program* illustrating each wetland's calculated *C*-value and FQI.

Information regarding the on-site portion of the identified wetlands is found on the attached USACE Data Forms (Appendix C). Wetland A has been determined to be critical due to its uniqueness, scarcity, function, and/or value, qualifying as a high-quality aquatic resource as follows: Wetland A has a native floristic quality index value (FQI) of greater than or equal to 20 as determined using the Chicago Region Floristic Quality Assessment Calculator (U.S. Army Corps of Engineers, Chicago District, most recent version). Wetland B is a standard, low-quality wetland with low species diversity with a calculated native floristic quality index value (FQI) of less than 20.

Wetland "A" (flags A1-A86)

The Spring Creek Watershed is a subwatershed of the Upper Fox River Basin. Wetland "A" identified on-site is a tributary flowing easterly into Spring Creek, located east of Bateman Road. The on-site segment of Wetland A identified and surveyed is part of a larger riverine system characterized by open, flowing water contained within a channel and dominated by persistent emergent plants. The open channel is intermittent and contains flowing water and segments of ponded water typically for only part of the year and collects and directs area runoff to Mud Lake/Spring Creek within the Spring Lake Forest Preserve.

The water table after flooding ceases is variable, extending from saturated to the surface to a water table well below the ground surface. The perennial, vegetative cover along the streambank is characterized by erect, rooted herbaceous hydrophytes that are present during the growing season each year. The species present remain standing throughout the growing season and remain until the beginning of the next growing season. Surface water is present for extended periods especially early in the growing season but may be absent by the end of the growing season in most years.

The lowest areas of Wetland A at the far south of the site are dominated by narrow leaved cattail (*Typha angustifolia*) and the channel bank is mostly wooded, comprised of a mix of mature trees in the overstory including eastern cottonwood (*Populus deltoides*), boxelder (*Acer negundo*), American elm (*Ulmus americana*) and an understory dominated by dense thicket of common buckthorn (*Rhamnus cathartica*).

The soil profiles sampled at various locations along the wetland edge at the project location studied exhibited a mix of sediment accumulation along with deep, organic, muck and/or silty loam soils and a depleted or reduced matrix. Hydrologic indicators identified on site included observations of flowing water, surface inundation and saturation due to fluctuating water levels and flooded conditions. NRCS hydric soils mapped for the site sampling

locations include 152A- Drummer silty clay loam, 0-2% slopes and 1903A-Muskego and Houghton mucks, undrained, 0-2%slopes.

The channel receives, stores, and conveys water from the surrounding landscape and upstream within the watershed. Indicators of wetland hydrology included the presence of open water, soil saturation, water marks, drainage patterns, and geomorphic position.

The calculated Floristic Quality Assessment for the plants inventoried resulted in a native mean C-value of 2.78 and a native FQA of 22.92, indicating that the wetland is of high vegetative quality and diversity from a natural areas perspective.

Wetland benefits include water quality functions such as sediment removal, and pollutant/nutrient retention and removal. Other benefits may include plant and wildlife habitat and food chain support. Since a well-defined drainage connection to Traditionally Navigable Waters (TNW) is clearly evident, the US Army Corps of Engineers has determined that Wetland "A" is under federal jurisdiction. Wetland A is characterized by data point 4a on the USACE data sheets included in Appendix C. Below is the plant inventory and floristic quality calculator results for Wetland "A":

Wetland "B" (flags B1-B14)

Wetland B is an isolated depression that is bisected by the existing gravel drive and may have a hydrologic connection to Wetland A during extreme flooding events and/or when the culvert under Bateman Road has been obstructed. The water table after flooding ceases is variable, extending from saturated to the surface to a water table well below the ground surface.

The perennial, vegetative cover within the depression is characterized by erect, rooted herbaceous hydrophytes that are present during the growing season each year. Wetland B is dominated by common, invasive woody and herbaceous plants including reed canary grass (*Phalaris arundinacea*) and sandbar willow (*Salix interior).* The species present remain standing throughout the growing season and remain until the beginning of the next growing season.

The soil profiles sampled along the wetland edge exhibited deep, organic, silt loam soils and a depleted or reduced matrix. Hydrologic indicators identified on site included observations of periodic inundation and saturation following significant precipitation events. NRCS hydric soils mapped for the site include 152A- Drummer silty clay loam.

Surface water is present for extended periods especially early in the growing season but may be absent by the end of the growing season in most years. The depression receives and stores runoff from the surrounding landscape. Indicators of wetland hydrology included inundation, soil saturation, drainage patterns, and geomorphic position.

The calculated Floristic Quality Assessment for the plants inventoried resulted in a native mean C-value of 2.18 and a native FQA of 7.24, indicating that the wetland is of low vegetative quality and diversity from a natural areas perspective.

Wetland benefits include water quality functions such as sediment removal, infiltration and groundwater recharge, and pollutant/nutrient retention and removal. Other benefits may include plant and wildlife habitat and food chain support. The US Army Corps of Engineers has determined that Wetland "B" is under federal jurisdiction.

Wetland B is characterized by data point 4a on the USACE data sheets included in Appendix C. Below is the plant inventory and floristic quality calculator results for Wetland "B":

RE: Soils – Varda Development – 99 Bateman Road, Barrington Hills

Dear Mr. Varda:

Ten soil borings/pits were made on the above referenced parcel in order to determine the septic suitability of the soils.

Boring 1-4 have a seasonally high water table between 6 and 8 inches below the surface. Borings 5-8 have a seasonally high water table between 14 and 21 inches below the surface and Borings 9 and 10 have a seasonally high water table at the surface.

The locations of the soil borings were staked by Vanderstappen Surveying at the locations depicted on the enclosed exhibit by Caldwell Engineering.

If you have any questions on this please feel free to contact my office.

Sincerely,

JOHN A. RABER & ASSOC., INC.

Bruce J. Houghtby, C.P.S.S./S.C.
Soil Scientist/Classifier

MAP INFORMATION

The soil surveys that comprise your AOI were mapped at 1:12,000.

Warning: Soil Map may not be valid at this scale.

Enlargement of maps beyond the scale of mapping can cause misunderstanding of the detail of mapping and accuracy of soil line placement. The maps do not show the small areas of contrasting soils that could have been shown at a more detailed scale.

Please rely on the bar scale on each map sheet for map measurements.

Source of Map: Natural Resources Conservation Service
Web Soil Survey URL:
Coordinate System: Web Mercator (EPSG:3857)

Maps from the Web Soil Survey are based on the Web Mercator projection, which preserves direction and shape but distorts distance and area. A projection that preserves area, such as the Albers equal-area conic projection, should be used if more accurate calculations of distance or area are required.

This product is generated from the USDA-NRCS certified data as of the version date(s) listed below.

Soil Survey Area: Cook County, Illinois
Survey Area Data: Version 16, Aug 31, 2022

Soil map units are labeled (as space allows) for map scales 1:50,000 or larger.

Date(s) aerial images were photographed: Jun 13, 2020—Sep 19, 2020

The orthophoto or other base map on which the soil lines were compiled and digitized probably differs from the background imagery displayed on these maps. As a result, some minor shifting of map unit boundaries may be evident.

Map Unit Legend

Map Unit Symbol	Map Unit Name	Acres in AOI	Percent of AOI
152A	Drummer silty clay loam, 0 to 2 percent slopes	32.5	34.9%
361C2	Kidder loam, 4 to 6 percent slopes, eroded	17.8	19.2%
361D2	Kidder loam, 6 to 12 percent slopes, eroded	4.8	5.1%
361E2	Kidder loam, 12 to 20 percent slopes, eroded	0.4	0.4%
442A	Mundelein silt loam, 0 to 2 percent slopes	9.0	9.7%
696B	Zurich silt loam, 2 to 4 percent slopes	6.3	6.8%
1903A	Muskego and Houghton mucks, undrained, 0 to 2 percent slopes	21.4	23.0%
W	Water	0.9	1.0%
Totals for Area of Interest		**93.0**	**100.0%**

PUBLIC HEARING
Before the Plan Commission
Village of Barrington Hills
Single Family Subdivision – 99 & 101 Bateman Road, Barrington Hills, IL

Notice is hereby given that a Public Hearing will be held on Monday, May 20 , 2024, at 6:30 PM by the Plan Commission of the Village of Barrington Hills at the Village Hall, 112 Algonquin Road, Barrington Hills, IL, concerning an application for approval of a Single Family Subdivision made by the Owner of the property located at 99 & 101 Bateman Road, Barrington Hills, PIN 01-06-200-021 and 01-06-200-027.

A copy of the application for Subdivision is available for examination at the office of the Village Clerk at the Village Hall, weekdays between 9:00 AM & 5:00 PM. All interested parties are invited to attend the Public Hearing and will be given an opportunity to be heard. Written comments on the application for Subdivision to be made part of the record of this proceeding and will be accepted in the Office of the Village Clerk through 3:00 PM, May 20, 2024.

Submitting Department:
Item Type: Minutes
Agenda Section: [Vote] Minutes

Subject:
[Vote] Minutes - Special Meeting September 11, 2023

Suggested Action:

Attachments:
9-11-23 Plan Commission Sp Mtg Minutes-Draft.pdf

VILLAGE OF BARRINGTON HILLS
Plan Commission Special Meeting Minutes
Monday, September 11, 2023 - 6:30 PM

The Special Meeting of the Village of Barrington Hills Plan Commission was called to order by Chairman Matt Vondra at 6:36 PM

Members Present:
Curt Crouse
Christopher Geier
Kelly Mazeski
Darrin Peterson
Ann Rosenbaum
Gillian Stoettner, Secretary
Matt Vondra, Chairman

Members Absent:
Maggie Topping

Also Present:
Darby Hills, Village Trustee (by phone)
Anna Paul, Village Administrator

PUBLIC COMMENTS:
None

APPROVAL OF MINUTES: August 18, 2022
Chairman Vondra asked for a motion to approve the minutes from the August 18, 2022 meeting as stated. Geier motioned, Peterson seconded. All present said aye. The minutes were approved.

NEW BUSINESS:

Robin VanCastle has moved out of the Village and can no longer serve as Vice Chair.

Plan Commission Vice Chair Nominee: Curt Crouse
A motion was made by Mazeski to approve Mr. Crouse as Vice Chair. Vondra seconded. All present said aye. The motion was approved unanimously.

Developer Proposal for Property Outside of Village: 780 W. County Line Road
Ram Prashantha is representing PROJADES. Mr. Prashant is here seeking luxury townhome approval at the corner or Old Hart Road and Lake Cook Road. 26 semi-custom townhomes, with two car garages. Empty nesters are the target market, although there are no age or family restrictions. Barrington recommended Mr. Prashantha to contact Illinois Department of Transportation (IDOT) regarding the main entrance right of way onto County Line Road. There will also be a one-way exit into the parking lot of the existing neighboring commercial building (Morgan Stanley) via an easement. Units would be 1,800 to 2,500 sq. ft. There is an intergovernmental agreement between Barrington and Barrington Hills with limits to use. Total acres of the property being discussed is 4.33 acres. The site is currently zoned B2. 2,000 linear feet of sewer line would have to be installed, thus 26 units to make the sewer cost effective. Village Administrator Paul stated that Mr. Prashantha presented the changes he needs for the

IGA / PUD plan to the Village of Barrington for approval. Barrington needs to indicate that this is something they desire in order to accept the variances. Mr. Prashantha indicated that he is already two-months into a six-month contract. Purchase of the property is contingent upon the approval of the development. Barrington is the moving party regarding the IGA. Number of potential vehicles and school attendance locations were mentioned.

Welcome Ann Rosenbaum
Ann Rosenbaum joins the Plan Commission

Comprehensive Plan – Guiding Principles
The comprehensive plan was revised in August of 2019. We wish to review the plan to make sure we have covered our intended principles to the Village.

Trustee Hills
No update at this time.

ADJOURNMENT:
Chairman Vondra requested a motion to adjourn. Mazeski motioned, Peterson seconded. All present said aye. The meeting was adjourned at 7:47 PM
Respectfully submitted,

Gillian Stoettner
Recording Secretary
