

Build 220 — Architectural & Engineering Fees

Actual Spending vs. 7.4% Contractual Cap

The district's master agreement capped total A/E fees at **7.4%** of the construction budget ($\approx \$9.49M$). FOIA records and the district AR ledger show approximately **\$11.74M** paid—about **9.15%** of construction.

Metric	Amount
Construction Budget (Baseline)	\$128.29M
Contract Cap (7.4%)	$\approx \$9.49M$
Actual A/E Paid	$\approx \$11.74M$
Over Cap	$\approx \$2.25M$

Drivers of the overage include: duplicated planning across firms, over-sscoped civil engineering bundles later credited back, optional enhancements not included in referendum language, and avoidable redesigns.
